4.1. Report of the President

The Statistical Society of Canada (SSC) has been quite busy with many activities and moving ahead because of the dedication of a network of volunteers working in various capacities.

Membership and Finance:

The SSC is very active with over 1000 individual members and 33 institutional members. Treasurer, John Koval, has worked diligently to keep our books in order with a close eye on our revenues and expenses. The strong volunteering base in the Society has kept expenses low.

The Office:

Johan Rudnick is the new director of the Canadian Mathematical Society (CMS) and our interaction with the CMS office has been smooth last year. We are very grateful to David Binder, SSC Executive Director who has been visiting the CMS office regularly. The SSC contract with the CMS office ends on August 31, 2010 and a committee chaired by Don McLeish (other members: Bovas Abraham, David Binder and Hugh Chipman) has been working with the office for a new contract.

Committees and Sections:

There have been some changes in Committees. Student Travel Award Committee will become a continuing committee with the new name Student Travel **Grant** Committee on July1, 2010. NSERC Liaison Committee's term was over on June 30, 2009 and so its function was added to the Research Committee. The research committee under the leadership of Richard Cook is in contact with NSERC regarding the current processes for grant allocations and on other issues. The CJS Transition Committee completed its work on December 31, 2009. AusCan Committee's term will finish this year.

Elections Committee: Election software is moved from University of Laval to the CMS office in Ottawa and the election was conducted electronically as in the last two years.

Statistical Education Committee: The second International Statistical Literacy Competition organized by the International Association for Statistical Education (IASE) for school students around the world (23 countries) was held in Durban, South Africa. The Canadian participant in the competition was Grade 8 student Amanda Ens (Eastview Public School in Oakville, Ontario, Teacher: Karen Livingston). Alison Gibbs (chair of the Statistical Education Committee) participated in the Canadian student selection and the SSC contributed towards Amanda's travel expenses. Amanda won second in her age group in that competition. I was present during the award ceremonies. It was a very proud moment for all of us. There is an article about this event in the November 2009 issue of *Liaison.*

This committee also organized a workshop for grade 7 and 8 teachers in Toronto on May 7, 2010. This is part of the SSC's **developmental effort**. SSC is also helping the educational effort with some Math Fair prizes in the Halton - Peel Region and with subsidy for teachers to attend the Meeting Within a Meeting at the JSM in Vancouver.

The Probability Section by-laws were approved by the Board.

Electronic Services:

The Executive Committee initiated another **developmental project**. The SSC has a new website now. We appreciate the huge effort by Hugh Chipman, Manager of Electronic Services, who worked diligently to implement this. The next phase of this work is to have online membership renewal by November 2010.

Accreditation:

The SSC Accreditation Program continues to grow steadily with Neil Arnason as Chair. As of May 2010 there are around 110 members in the P.Stat. designation and 33 in the A.Stat. American Statistical Association (ASA) is following SSC and has approved the establishment of an accreditation similar to P.Stat. Judy Chapman from the SSC is in ASA's accreditation implementation committee. The SSC and the ASA are planning to have some agreements for cross accreditation.

Publications:

The *Canadian Journal of Statistics (CJS)* is now printed, distributed and promoted by Wiley-Blackwell. The new editor of CJS as of January 1, 2010 is Jiahua Chen of University of British Columbia. On behalf of the executive, the board, and all SSC members, I would like to thank Paul Gustafson for his outstanding work as editor during the last three years. Angelo Canty is the new managing editor of *CJS* from January 1, 2010. George Styan has served as managing editor of *CJS* assisted by Evelyn Styan for many years and has decided to pass the torch on to Angelo. On behalf of the SSC I would like to thank George and Evelyn for their outstanding service to the SSC.

The SSC newsletter *Liaison* is in the able hands of Larry Weldon who has been doing an outstanding job. A big thank you to Larry.

Last fall, the SSC signed a contract with Springer for a Statistics and Probability encyclopedia. It is supposed to establish an online, dynamic, and open access probability and statistics encyclopedia/wikipedia in conjunction with some statistical societies such as ASA, Bernoulli, IBS, and ISI. David Bellhouse is the SSC representative on the Editorial Board of this encyclopedia.

Meetings

This year's SSC annual conference is jointly held with the Association des statisticiennes et des statisticiens du Québec and it promises to be a big success with over 350 talks and around 500 attendees. The presidential invited address will be given by **Nobel Laureate Robert Engle**, Stern School of Business, New York University. The Program Committee chair Christian Léger and Local Arrangements Committee chair, Thierry Duchesne have been working very hard to make the conference a success. Contributions from Meetings Coordinator Duncan Murdoch on many issues, Treasurer John Koval on the financial front and Cynthia Bocci on overseeing the bilingual abstracts are appreciated.

During JSM-2009, COPSS Florence Nightingale David Award was awarded to a distinguished SSC member, Nancy Reid (University of Toronto). In the same meeting ASA announced its new fellows which included the following SSC members: Syed Ejaz Ahmed (University of Windsor), Naomi S. Altman (Pennsylvania State University),

Keumhee Chough Carriere (University of Alberta), Jiahua Chen (University of British Columbia), and Chris Wild (University of Auckland); IMS announced its fellows and Boxin Tang (Simon Fraser University) was one of them.

During the International Statistical Institute (ISI) biennial session in Durban, South Africa (August 16-22, 2009) there was a meeting of representatives from many national statistical societies and I participated in that meeting on behalf of the SSC. There was discussion of an international federation of statistical societies which will be followed up by the ISI executive.

The SSC sponsored a conference last year: International Symposium in Statistics (ISS) on Inferences in Generalized Linear Longitudinal Mixed Models (GLLMM), St. John's, NL, July 20-22, 2009. The SSC is sponsoring 'Statistics 2011 Canada: 5th Canadian Conference in Applied Statistics', June 30 to July 3, 2011, Concordia University and the '4th International Conference on Establishment Surveys (ICES IV)', June 2012, Montreal.

Awards:

The SSC annual meeting will highlight the research achievements and service contributions of several individuals. Christian Genest chairs the Awards Committee. An Honorary Member will be inducted and awards will be presented to the winner of the Gold Medal, the recipients of the SSC Distinguished Service Award, the Lise Manchester Award (Chair: David Belhouse) and the Award for Impact of Applied and Collaborative Work (Chair: Chris Field). The winner of the CRM-SSC Prize (chair: Louis-Paul Rivest) is Grace Yi, University of Waterloo, the authors of the best paper published in 2009 in *the CJS* (Chair: Mary Lesperance) are Lajos Horvth (University of Utah), Piotr Kokoszka(Utah State University), and Matthew Reimherr (University of Chicago). The winner of the Pierre Robillard Award (Chair: Jean-Fancois Angers) is Michelle Qian Zhou, University of Waterloo (Supervisors: Mary Thompson, University of Waterloo and Peter Song, University of Michigan).

The Award for Case Studies in Data Analysis and the Student Presentation Award are both adjudicated at the annual meeting and the committee chairs are Kevin J. Keen and Rhonda Rosychuk respectively. The Sections and the SSC will support the student travel grants program again this year and the Student Travel Award Committee, chaired by Jason Loeppky, will grant 17 such awards each valued at $500.

Final Remarks:

It has been a pleasure working on behalf of the Society as President this past year. I do appreciate the dedicated efforts of a network of volunteers, the colleagues on the executive, committee chairs, publication editors and the list goes on. Let me take this opportunity to thank them all. Congratulations to those who are newly elected or being appointed. I wish the best of success to the incoming team.

Respectfully submitted,
Bovas Abraham
SSC President 2009-2010

4.1. Rapport du président

La Société statistique du Canada (SSC) a été très occupée par ses nombreuses activités et a bien progressé grâce au dévouement d'un réseau de bénévoles qui travaillent à divers titres.

Membres et finances :

La SSC est très active, avec plus de mille membres individuels et 33 membres institutionnels. Le trésorier, John Koval, a travaillé diligemment à la bonne gestion de nos comptes, en surveillant de près nos recettes et nos dépenses. Le bénévolat au sein de la Société a permis de minimiser les dépenses.

Bureau :

Johan Rudnick est le nouveau directeur de la Société mathématique du Canada (SMC); notre collaboration avec les bureaux de la SMC a continué sans heurts cette année. Nous sommes très reconnaissants envers David Binder, le directeur exécutif de la SSC, qui visite régulièrement les bureaux de la SMC. Le contrat de la SSC auprès de ces bureaux prend fin le 31 août 2010 et un comité présidé par Don McLeish (autres membres : Bovas Abraham, David Binder et Hugh Chipman) négocie un nouveau contrat avec la SMC.

Comités et groupes :

Il y a eu certains changements au sein des comités. Le Comité des subventions allouées aux étudiants deviendra un comité permanent le 1er juillet 2010 sous le nouveau nom de Comité des subventions **de voyage** aux étudiants. Le mandat du Comité de liaison avec le CRSNG a pris fin le 30 juin 2009; sa fonction a été intégrée au Comité de la recherche. Ce dernier comité, sous la direction de Richard Cook, est en contact avec le CRSNG concernant les processus actuels d'allocation des subventions et autres questions. Le comité de transition de la RCS a complété ses travaux le 31 décembre 2009. Le mandat du comité du boursier AusCan prend fin cette année.

Comité d'élection : Le logiciel électoral a migré de l'Université de Laval aux bureaux de la SMC à Ottawa et les élections se sont déroulées par voie électronique, comme depuis deux ans.

Comité d'éducation en statistique : La seconde Compétition internationale de statistique organisée par l'International Association for Statistical Education (IASE) pour les élèves du monde entier (23 pays) s'est tenue à Durban, en Afrique du Sud. La participante canadienne à la compétition était une élève de 8e année, Amanda Ens (Eastview Public School à Oakville, Ontario, enseignante : Karen Livingston). Alison Gibbs (présidente du Comité d'éducation en statistique) a participé à la sélection des élèves canadiens et la SSC a contribué aux frais de voyage d'Amanda. Amanda a placé seconde dans sa catégorie d'âge dans cette compétition. J'étais présent lors de la cérémonie de remise des prix. Nous avons tous partagé un sentiment de grande fierté. Un article est paru à ce sujet dans le numéro de novembre 2009 de *Liaison.*

Ce comité organise également un atelier à l'intention des enseignants de 7e et de 8e années à Toronto, le 7 mai 2010, dans le cadre des **efforts de développement** de la SSC. La Société contribue par ailleurs plusieurs prix de foires aux mathématiques dans la région Halton - Peel et une bourse pour des enseignants qui souhaitent participer à la Meeting Within a Meeting lors des JSM à Vancouver.

Les statuts du Groupe de probabilité ont été approuvés par le Conseil d'administration.

Services électroniques :

Le comité exécutif a initié un autre **projet de développement**. La SSC dispose aujourd'hui d'un tout nouveau site Web. Nous apprécions les immenses efforts de Hugh Chipman, gérant des services électroniques, qui y a travaillé diligemment. La prochaine phase de ce travail est de proposer le renouvellement des adhésions en ligne dès novembre 2010.

Accréditation :

Le programme d'accréditation de la SSC continue son expansion immuable sous la direction de Neil Arnason. En mai 2010, nous comptons quelque 110 membres avec la désignation P.Stat. et 33 avec la désignation A.Stat. La American Statistical Association (ASA) a suivi l'exemple de la SSC et vient d'approuver la création d'un processus d'accréditation similaire au système P.Stat. Judy Chapman de la SSC siège au comité d'accréditation de l'ASA. La SSC et l'ASA prévoient des accords relatifs à l'accréditation croisée.

Publications :

La revue canadienne de statistique (RCS) est désormais imprimée, distribuée et promue par Wiley-Blackwell. Le nouveau rédacteur en chef de la *RCS*, depuis le 1er janvier 2010, est Jiahua Chen de la University of British Columbia. Au nom de l'exécutif, du Conseil d'administration et de tous les membres de la SSC, je tiens à remercier Paul Gustafson pour son travail remarquable à titre de rédacteur en chef ces trois dernières années. Angelo Canty est le nouveau directeur de la production de la *RCS* depuis le 1er janvier 2010. George Styan, assisté par Evelyn Styan, a servi comme directeur de la production de la *RCS* pendant de longues années et a décidé de passer la main à Angelo. Au nom de la SSC, je tiens à remercier George et Evelyn pour leur service remarquable auprès de la SSC.

Le bulletin de nouvelles de la SSC, *Liaison*, repose entre les mains capables de Larry Weldon qui fait un travail exceptionnel. Un grand merci à Larry.

L'automne dernier, la SSC a conclu avec Springer un contrat pour une encyclopédie de la statistique et de la probabilité. Il s'agit de créer une encyclopédie/wiki en ligne, dynamique en libre accès sur la probabilité et la statistique en collaboration avec diverses sociétés statistiques telles l'ASA, Bernoulli, l'IBS et l'IIS. David Bellhouse représente la SSC au comité de rédaction de cette encyclopédie.

Congrès :

Le congrès annuel de la SSC, qui se tient cette année en conjonction avec l'Association des statisticiennes et des statisticiens du Québec, promet d'être un vif succès avec plus de 350 présentations et quelque 500 participants. L'allocution de l'invité du président sera prononcée par le **lauréat du prix Nobel Robert Engle**, de la Stern School of Business, New York University. Christian Léger, le président du programme scientifique, et Thierry Duchesne, le président des arrangements locaux, ont tout fait pour que ce congrès soit une réussite. Nous sommes reconnaissants des contributions du coordonnateur des congrès Duncan Murdoch à de nombreux titres, du

trésorier John Koval sur le front financier et de Cynthia Bocci, qui a supervisé la présentation bilingue des résumés.

Durant les JSM-2009, le Prix Florence Nightingale David du COPSS a été décerné à une éminente membre de la SSC, Nancy Reid (University of Toronto). L'ASA a profité de la conférence pour annoncer le nom de ses nouveaux fellows, dont plusieurs membres de la SSC : Syed Ejaz Ahmed (University of Windsor), Naomi S. Altman (Pennsylvania State University), Keumhee Chough Carriere (University of Alberta), Jiahua Chen (University of British Columbia) et Chris Wild (University of Auckland); l'IMS a également annoncé ses nouveaux fellows, dont Boxin Tang (Simon Fraser University).

Lors de la séance biennale de l'Institut international de statistique (IIS) à Durban, Afrique du Sud (16-22 août 2009), une réunion a été organisée pour les représentants des sociétés statistiques nationales à laquelle j'ai participé pour le compte de la SSC. Nous avons notamment discuté de créer une fédération de sociétés internationale; l'exécutif de l'IIS fera suite.

La SSC a commandité l'année dernière une conférence intitulée Symposium international en statistique sur les inférences dans les modèles mixtes longitudinaux linéaires généralisés, à St. John's (T.-N.) du 20 au 22 juillet 2009. La SSC commandite « Statistics 2011 Canada: 5th Canadian Conference in Applied Statistics » du 30 juin au 3 juillet 2011 à l'Université Concordia et la « 4th International Conference on Establishment Surveys (ICES IV) » en juin 2012 à Montréal.

Prix :

Le congrès annuel soulignera les contributions en recherche et service de plusieurs individus. Christian Genest préside le comité des prix. Un membre honoraire sera intronisé et des prix seront présentés aux récipiendaires de la médaille d'or, du prix pour services insignes de la SSC, du Prix Lise-Manchester (président : David Bellhouse) et du prix pour l'impact du travail collaboratif et appliqué (président : Chris Field). La récipiendaire du prix CRM-SSC (président : Louis-Paul Rivest) est Grace Yi, de la University of Waterloo, les auteurs du meilleur article publié en 2009 dans la *RCS* (présidente : Mary Lesperance) sont Lajos Horváth (University of Utah), Piotr Kokoszka (Utah State University), et Matthew Reimherr (University of Chicago). La récipiendaire du Prix Pierre-Robillard (président : Jean-François Angers) est Michelle Qian Zhou, de la University of Waterloo (superviseurs : Mary Thompson, University of Waterloo et Peter Song, University of Michigan).

Le prix pour les études de cas en analyse de données et le prix pour les présentations étudiantes sont jugés lors du congrès annuel; les présidents des comités respectifs sont Kevin J. Keen et Rhonda Rosychuk. Les groupes et la SSC financent une fois de plus le programme de bourses de voyages pour les étudiants; le Comité des subventions allouées aux étudiants, présidé par Jason Loeppky, décernera 17 bourses d'une valeur de 500 $ chacune.

Observations finales :

J'ai eu énormément de plaisir à servir la Société à titre de Président cette année. J'apprécie vraiment tous les efforts de notre réseau de bénévoles, de mes collègues de l'exécutif, des présidents des comités, des rédacteurs de nos publications, etc. Je tiens à profiter de cette occasion pour les remercier tous. Félicitations à celles et à ceux qui sont nouvellement élus ou nommés. Je souhaite beaucoup de réussite à la nouvelle équipe.

Le tout respectueusement soumis,
Bovas Abraham
Président de la SSC, 2009-2010

4.3. Report of the President-Elect

(Membership and office negotiations reported on in 6.4 and 7.3)

Interactions

As a general principle, wherever possible, I would like to reduce the burden to SSC committees and committee chairs by collaborating with CMS and others. When our interests overlap, we nominate members to a corresponding CMS committee rather than maintain an independent SSC committee. In general, one of the prime advantages of maintaining and furthering contacts with the CMS is to generate more synergies, in office operations such as electronic services, as well in increasing the level of literacy and the profile of statistics and mathematics in the wider community. A potential danger to this is a loss of profile for (applied) Statistics as an independent discipline. Much of the value of our discipline is not easily assessed using the norms of mathematics. The conference model NSERC has recently adopted for discovery grant adjudication, which pools us with pure and applied mathematics, is some indication that the separate nonmathematical aspects of our discipline are not afforded adequate recognition. The message we can draw is perhaps two-fold: we must do a better job of adequately representing to all levels of society and policy makers the importance and diversity of statistical thinking and research. And evidently our relationship with the mathematics community is far from over, so this job must succeed first there.

Statistical Education

I enjoyed the *Statistical Thinking Workshop* on May 7, 2010 at the UT Mississauga campus organised by Kevin Thorpe and Allison Gibbs and the Statistical Education committee (presenters: Paul Field, ASA, Mary Townsend, Cynthia Rutledge, Statistics Canada, and Kevin Thorpe). I thank Bovas for passing this to me as his delegate; it was an extremely enjoyable and informative workshop and reminded me again of the importance of statistical education**, at all levels**. Bovas and I discussed with the executive director of the CMS some SSC participation in the Math Camps sponsored by the CMS. In my view, we should engage in joint projects which raise the level of understanding of our discipline with the CMS wherever possible. We have may have similar views on promoting the disciplines in high schools, and in communicating with NSERC about research funding. Once we have more detail from the CMS on the nature of our participation in the Math Camps, I would hope to get the Statistical education committee and others involved.

JSM

Booth space is available to the SSC and the JSM Vancouver. Anyone who will be in Vancouver and willing and able to (wo)man this booth, please let me know. The space for the SSC reception is allocated but catering arrangements have not yet been made.

Respectfully submitted,
Don McLeish
President-Elect

4.4. Report of the Executive Secretary

Electronic votes

In February 2010, the Board granted the authorization to the executive secretary to conduct votes electronically.

Subsequent electronic votes were conducted on the 2010 Honorary Membership (February-March 2010) and on the Probability Section Regulations (March 2010). Both were approved.

Meetings

In addition to the Board meeting in October 2009, meetings of the Executive Committee were held in September, October and November 2009, and February, March and April (twice) 2010.

In all cases, minutes were written.

Two meetings are scheduled as part of the SSC 2010 (May 23 and May 26).

Respecfully submitted,
Julie Trépanier
Executive Secretary

4.5. Report of the Treasurer

(See separate attachments)

4.6. Report of the Publications Officer

The major activities undertaken since last year's report submitted in October 2009 are as follows:

- **Editor for the *Canadian Journal of Statistics* (CJS)**

The search for a successor to Paul Gustafson as the next editor was fruitful. Jiahua Chen, University of British Columbia, accepted the appointment as Editor of CJS, effective January 1, 2010. The three-year appointment will end on December 31, 2012.

- **Special Section of an Issue of CJS devoted to a Conference in Waterloo**

The Publications Committee discussed a request from Don McLeish and Jiahua Chen for a special section of an issue (likely March/June 2011) of the CJS devoted to the conference "Statistical Methods and Life History Analysis: A Conference in Celebration of the Contributions of Jack Kalbfleisch and Jerry Lawless to the Statistical Sciences", to be held at the University of Waterloo, May 20-21, 2010. The committee recommended approval of the request with the following specifics:

  - The number of pages for the special section will be no more than 120 in total (approximately 8 papers, 15 pages each). The remaining portion of that issue will consist of regular papers.
  - All articles will be peer-reviewed as regular CJS submissions.
  - Richard Cook, Chair of the Organizing Committee, will serve as the Guest Editor.

- **JSTOR Revenue**

A summary of the JSTOR Publisher Revenue Sharing Allocation was received from Mary Pugh, Content Development Assistant at JSTOR, on April 08, 2010. The amount allocated to SSC for 2009 is $4,685.76. The payment was sent to the SSC office by post on March 11, 2010, and confirmation of the payment was given by John Koval.

The Publisher Sales Service fee for CJS is currently set at $0 per article by the SSC. A possible fee increase (e.g. $4/article) was discussed, and it was decided to continue not charging any base fee for this calendar year.

Respectfully submitted,
Wendy Lou
Publications Officer

4.7. Report of the Meetings Coordinator

1. SSC 2010 meeting in Quebec

At the time of this writing, there are 500 registered attendees. This is the higher number of attendees used in budgeting, so we appear to be heading for a good profit from the meeting. So far we appear to have adequate facilities to handle everyone (the banquet can seat 600). The corresponding workshop numbers are 47 (Biostats), 17 (Survey Methods), and 32 (BISS). It should be a great meeting!

2. SSC 2011 meeting in Wolfville

See report 5.4.2.

3. SSC 2012 meeting in Guelph

See report 5.4.3.

4. SSC 2013 meeting in Western Canada

Currently we have some interest expressed from University of Alberta and University of Northern British Columbia, but no firm bids in hand.

5. Special Conference on Hard to Reach Populations in 2012

Nancy Bates of the US Census Bureau and Pierre Lavallée of StatCan requested SSC Sponsorship of this conference, with financial participation by the SSC. After some discussion the Program Committee recommended to the President that we offer to be co-sponsors without financial participation.

Respectfully submitted,
Duncan Murdoch
Meetings Coordinator

4.8. Report of the Executive Director

As Executive Director, I am in regular contact with the SSC Office in Ottawa. This allows me to easily follow up on various requests for the Office, as well as requests made by the Office to certain members. I participate at meetings of the Executive Committee and the Board.

Having access to the database (generally one month out of date), allows me to answer several queries regarding members' status (e.g. which members have paid their SSC dues or Accreditation fees, as well as which institutions are institutional members in good standing.)

Johan Rudnick has assumed responsibilities as the Executive Director of the Canadian Mathematical Society (where our SSC Office is situated). He has been very responsive to our needs and concerns over the year. There have been some staff changes at the CMS Office, but our service from the Office has maintained a high level of quality.

I have also had some liaison with Ron Wasserstein, Executive Director of the American Statistical Association, on matters relating to Accreditation.

I am still maintaining most of the SSC aliases, but there have been discussions with the Office as to how this could be integrated with the database, and thereby more systematized.

Respectfully submitted,
David Binder
Executive Director

4.9. Report of the Electronic Services Manager

I would like to report the following updates since October 2009:

1. On November 11, 2009, a RFP was issued for migration of the SSC website to a more sophisticated "content management system" (CMS). We received over 20 bids. The RFP process was a learning experience, during which our requirements were updated significantly. Ultimately we choose OSSCube, a company with its primary office in India and an per-hour contract. Work began in February on the webpage migration, and the final product went live on May 4. This process entailed considerable effort, and would not have been possible without extensive assistance from SSC office staff Alan Kelm and Steve LaRocque. The total cost will be in the vicinity of $20,000. This included considerable extra hours from SSC staff in defining carefully the specifications of the new website. The vast majority of pages in the current website were migrated, a time-consuming process.

   Training of volunteers who edit various parts of the webpage has begun and will continue. The new system promises to provide a more flexible and easy to use interface for those who editing content. The new look of the page resembles the old, and there have been modest changes and improvements to the navigation structure of the page. The biggest change is in the interface for editing content.

2. The electronic voting system used for annual SSC elections was successfully migrated from Laval University to the SSC office. Alan Kelm did this work, with considerable input from Roman Viveros and some advice from myself.

3. Several new projects will be starting shortly. These include
   - development of an online membership renewal system (via our webpage) for the 2011 memberships,
   - integration of committee listings on our webpage and email aliases for committees with the office database (this information is currently entered in the webpage and email alias list by two separate manual processes),
   - development of an online abstract submission system for the 2011 SSC annual meeting, to replace the aging system run by CRM.

Other more routine aspects of electronic services are proceeding normally.

Respectfully submitted,
Hugh Chipman
Electronic Services Manager

5.2. Report of the Elections Committee
5.2. Rapport du Comité des élections

2010 ELECTIONS ● ÉLECTIONS 2010

1. Candidates elected by acclamation / Candidats élus par acclamation

The following individuals were declared elected by acclamation, as they ran unopposed.
Les personnes suivantes ont été déclarées élues par acclamation, faute d'opposition.

- **John Brewster** (University of Manitoba)
    - President-Elect / Président élu
      2010-07-01 – 2011-06-30
    - President / Président
      2011-07-01 – 2012-06-30
    - Past President / Président sortant
      2012-07-01 – 2013-06-30
- **Wendy Lou** (University of Toronto)
    - Publications Officer / Directeur des publications
      2010-07-01 – 2013-06-30
- **Yutaka Yasui** (University of Alberta)
    - President-Elect / Président élue
      Biostatistics Section / Groupe de biostatistique
      2010-07-01 – 2011-06-30
    - President / Président
      Biostatistics Section / Groupe de biostatistique
      2011-07-01 – 2012-06-30
    - Past President / Président sortante
      Biostatistics Section / Groupe de biostatistique
      2012-07-01 – 2013-06-30
- **Karen Kopciuk** (University of Calgary)
    - Secretary / Secrétaire
      Biostatistics Section / Groupe de biostatistique
      2010-07-01 – 2013-06-30
- **Boxin Tang** (Simon Fraser University)
    - President-Elect / Président élu

Business and Industrial Statistics Section / Groupe de statistique industrielle et de gestion
2010-07-01 – 2011-06-30
  - President / Président
    Business and Industrial Statistics Section / Groupe de statistique industrielle et de gestion
    2010-07-01 – 2011-06-30
  - President-Elect / Président élu
    Business and Industrial Statistics Section / Groupe de statistique industrielle et de gestion
    2010-07-01 – 2011-06-30

- **Mark Reesor** (The University of Western Ontario)

  - Secretary / Secrétaire
    Business and Industrial Statistics Section / Groupe de statistique industrielle et de gestion
    2010-07-01 – 2013-06-30

- **Hao Yu** (The University of Western Ontario)

  - President-Elect / Président élu
    Probability Section / Groupe de probabilités
    2010-07-01 – 2011-06-30
  - President / Président
    Probability Section / Groupe de probabilités
    2011-07-01 – 2012-06-30
  - Past President / Président sortant
    Probability Section / Groupe de probabilités
    2012-07-01 – 2013-06-30

- **François Watier** (Université du Québec à Montréal)

  - Secretary / Secrétaire
    Probability Section / Groupe de probabilités
    2010-07-01 – 2013-06-30

- **David Haziza** (Université de Montréal)

  - President-Elect / Président élu
    Survey Methods Section / Groupe des méthodes d'enquête
    2010-07-01 – 2011-06-30
  - President / Président
    Survey Methods Section / Groupe des méthodes d'enquête
    2011-07-01 – 2012-06-30
  - Past President / Président sortant
    Survey Methods Section / Groupe des méthodes d'enquête
    2012-07-01 – 2013-06-30

- **Lenka Mach** (Statistics Canada / Statistique Canada)

- Treasurer / Trésorier
  Survey Methods Section / Groupe des méthodes d'enquête
  2010-07-01 – 2012-06-30

2. Candidates elected through votes / Candidats élus par voie de scrutin

The voting period started on April 9, 2010; it ended on May 10, 2010. / La période de votation a commencé le 9 avril 2010 et s'est terminée le 10 mai 2010.

E-mail reminders were sent on April 23 and May 2, 2010. / Des rappels électroniques ont été expédiés les 23 avril et 2 mai 2010.

The results were tallied in Hamilton, ON on May 11, 2010, by Peter Macdonald and Román Viveros-Aguilera. / Les résultats ont été compilés à Hamilton, ON le 11 mai 2010 par Peter Macdonald et Román Viveros-Aguilera.

General Election / Élections générales

Number of eligible voters / Nombre d'électeurs éligibles 1068

Román Viveros-Aguilera

Respectfully submitted / Salutations distinguées,
Román Viveros-Aguilera
President of the Elections Committee
Président du Comité des élections

5.4.1A. Report of the SSC 2010 Program Chair

My full-length report is the 213 pages document on a USB key that all participants have received. A shorter 63 pages version, without abstracts, has also been printed and distributed in the conference bag. But I thought that an even shorter summary with highlights could be useful.

Summary Statistics

- A total of 328 scientific presentations in 47 invited sessions (124 presentations) and 33 contributed sessions (204 presentations). This is fairly similar to last year when there were 48 invited sessions and 40 contributed sessions. Last year, posters were organized in 8 sessions rather than 2 this year and included some topics contributed poster sessions by NICDS projects. Before 2008 (which was a special meeting with the French SFdS), the largest total number of sessions was 70 in 2006

Innovations

- 2 plenary sessions and 3 slots of parallel sessions per day
- The CJS, Pierre-Robillard, and CRM-SSC Awards Addresses are once again plenary. The Impact Award also has a plenary session. The format has allowed a new plenary session by a prestigious speaker.
- Introduced the concept of Introductory Overview Lectures to the SSC Meeting (3)
- The introduction of another plenary session per day leads to long days on Monday and Tuesday, but this was the schedule of the Ottawa meeting; feedback from the Board on this schedule during Wednesday's meeting (once we have gone through it) may be useful for future meetings.

Invited Sessions

- Usual special talks as plenary sessions (Presidential Invited Address, Gold Medal, Pierre-Robillard, CJS, and CRM-SSC Awards Addresses)
- SSC Impact Award as a plenary session
- Plenary talk by Rob Tibshirani on the Lasso (my decision)
- 16 usual sessions organized by sections
- Usual Committee on Women in Statistics Session
- ASSQ and QICSS were invited to organize a session each
- 9 invited sessions suggested by members (out of 15 that responded to my call for sessions)
- 3 invited sessions for which I solicited organizers to balance the program
- 3 invited sessions in actuarial science (plus a fourth one organized by BISS) to ensure a sufficient concentration of activities in the area to justify a large participation by that community
- 3 IOL on topics that I selected (15 topics were suggested by members)
- Invited the New Researchers and the Accreditation Committees to organize a session each for their members
- I solicited organizers for a session on a National Institute and a session on Interdisciplinary Research and Training

- The approved speakers' budget at the October Board Meeting was of $30,000. As of now, the allocated amounts add up to $23,800.

Contributed Sessions

- 29 contributed sessions of oral presentations (160) plus 2 poster sessions (29 posters) and 2 case studies (15 teams).
- Many invited and contributed speakers were not registered in the days prior to the early bird deadline. They were all contacted. In the end, 31 oral presentations and 3 posters had to be removed from the program. This has led to a reduction of the total number of contributed paper sessions from 34 to 29.

Student Presentation Awards

- This year, I urged the organizers of the Student Presentation Awards (SPA) to put their deadline for submitting the four-page document supporting their presentation much earlier (March 15). This turned out to be very important as 59 students indicated that they wanted to take part in the competition, but only 34 ended up entering the competition (a 35th did not register by the deadline). It is important to know who will actually enter the competition as all of these students must present in the first five (of eight) parallel time slots since the awards are given at the banquet. This year, I have once again been able to schedule those presentations according to topic (rather than in special sessions for students), but this means that if one presents a talk on a topic that doesn't have a student taking part in the competition, that session almost has to be scheduled late Tuesday or Wednesday. All but one of the contributed paper sessions in the first five time slots has at least one student making a presentation as part of SPA.

Presence of Women in the Scientific Program

- To increase the presence of women in the invited program, I included the following paragraph in the call for proposals of sessions to d-ssc on July 9, 2009:

  "Women represent an ever increasing share of our membership. Yet, they continue to be underrepresented as invited speakers and session organizers in our Annual Meeting. When organizing a session, we often turn to our own professional network which does not always include women. But when we go beyond it, we can often identify women who would be excellent additions to a session. By raising the awareness of all, I hope that SSC 2010 will succeed in increasing the presence of women in the invited program. And it can all start with the session that you may want to organize!"
- This simple paragraph seems to have had an effect. Of the 53 organizers of invited sessions (including statutory sessions for which there is no flexibility in choosing an organizer), 22 were women (42%) and 20 of the 47 chairs were also women (43%). A total of 31 women are invited speakers (25% of 124).
- For contributed sessions, for which the Program Chair has entire control, 15 of the 29 chairs are women.
- At the 2005 October Board Meeting, Rhonda Rosychuk presented a document entitled "2000-2005 SSC Annual Meeting Participation by Gender". The percentages of female organizers, chairs, and invited speakers during that period were 28%, 29%, and 20%, with peaks for organizers of 40% (of 35) in 2005,

of 37% for chairs in 2001 (vs 46% this year), and 23% (of 83) for invited speakers in 2001. The program of the 2001 meeting was chaired by a woman (Mary Lesperance).

Media

- Monday turns out to combine a number of sessions that could be of interest for the media. The Presidential Invited Address features a Nobel Prize. Then the session Statistics and Science (organized by Agnes Herzberg) includes Peter Kavanagh of CBC who will talk about "Why Journalists Can't Count, Statisticians Can't Read and whether it Matters". The afternoon plenary talk is the SSC Impact Award Address by Rick Routledge on "Preserving Wild Pacific Salmon". Follows a session on Statistics in the Fight against Cancer. Finally a Panel Discussion (in French) on "What is the Role of a Statistical Association in Insuring Rigour in the Publication of Statistical Results in Media?" should also be of interest to the media and includes the chief editorialist of *Le Soleil* newspaper and a *Canadian Press* journalist who is also on the Board of Directors of the Quebec Professional Journalists Association.
- This slate of sessions was not planned with the media in mind. But once I recognized its potential, I contacted Wendy Lou, Bovas Abraham, and Thierry Duchesne to let them know. One potential drawback may be that Monday is a Holiday. You may hear separately from them on their attempts to attract journalists to the meeting.

Respectfully submitted,
Christian Léger
SSC 2010 Program Chair

5.4.1B. Report of the SSC 2010 Local Arrangements Committee Chair / 5.4.1B. Rapport du président du Comité des arrangements locaux de la SSC 2010

1. Registration numbers

At the end of the online registration period, we had the following registration figures:
- Sessions: 525 participants
- BISS/Proba: 36 participants
- Biostats: 51 participants
- Survey: 15 participants
- Extra banquet: 17
- BBQ: 183, including 30 who paid $35

We have space for about 80 additional on-site registrations (the banquet room is limited to 600 places, and so far we have 517 confirmed banquet participants).

2. Revenues

So far, the total revenues are **$191,225**. This includes all non-workshop related registrations in point 1 above as well as $15,700 in sponsorships and $7,590 from exhibitors. This should easily exceed all expenses (see meeting budget in Appendix A).

3. Rooms

Most activities (registration, parallel sessions, poster sessions, case studies, coffee breaks, exhibitors, annual general assemblies) will take place in the Vandry building. The hall might be a little crowded during the coffee breaks on Monday and Tuesday, but this should ensure maximal visibility for the exhibitors and poster presenters.

The first 3 plenaries will take place in the university theatre (620 places). Since we expect fewer than 500 people at the last 3 plenaries and since it is much closer to the Vandry building, the latter sessions will be held in Auditorium 1112 in the Pouliot building (500 places).

All lunch time committee meetings will include free lunches and will be held in the KRU2320/2330 room.

4. National institute in statistics round table

There will be a special round table discussion on the need for a national institute in statistics on Sunday at 4:15 pm in room 1245A of the Vandry building.

5. Welcome reception

To be held in the Atrium of the De Koninck building on Sunday, 6 pm until 8:30 pm. Every registration kit contains two coupons for free drinks. Food will be served.

6. Monday: Media day!

Several sessions are likely to generate media interest. Don't be surprised if you see journalists interviewing people or cameras filming in some of the sessions on that day. (These sessions include the opening session, the session on statistics in science, the ASSQ session on the role of a statistical association in the rigorous use of statistics in the media.)

7. Special NSERC information session

NSERC representatives will give information on the latest discovery grant competition and will answer questions and take comments from researchers.

8. Graduate student BBQ

A BBQ will take place at the Atrium of the De Koninck building on Monday at 6:30 pm. Every graduate student has a ticket for this event in his/her registration kit. Non students were allowed to purchase tickets.

9. Banquet

The banquet will be held at the Plaza Québec Hotel. We have organized transportation from the Vandry building (main door by the registration desk) to the hotel (departures at 6:30 pm and at the end of the AGM) and from the hotel to the residences and the Palace Royal hotel (continuously departures, starting at about 10:45 pm).

10. Internet access

Everyone has a username and a password for the ulaval-inv wireless network. For those who do not have access to wireless internet, a computer lab is available 24h a day in the Pouliot building.

11. Comments

- May 24 is not a holiday at Université Laval. Unfortunately it is a holiday for a very large proportion of Canadians (including Québecers). When we realized in February 2010 that the dates chosen to avoid the tourist rush in the city fell on Victoria Day weekend, it was too late to do anything. The moral of the story: when groups are bidding to get the meeting, carefully check that the proposed dates do not overlap with holidays or other important meetings!
- Program coordinators (Duncan Murdoch and Christian Léger) have a document that describes the timeline for organizing such a meeting that was really useful to me. To complement it, I have prepared a detailed timeline of what we did as a local arrangements committee (mainly constructed from the list of emails that I have received and sent over the last couple of years) that I can pass along to the meeting coordinators and future local organizers.

Respectfully submitted,
Thierry Duchesne
Chair of the SSC 2010 Local Arrangements Committee

5.4.1B. Report of the chair of the local arrangements committee SSC 2010 / 5.4.1B. Rapport du président du comité des arrangements locaux SSC 2010

Attachment : Meeting Budget / Annexe: Budget du congrès

SSC 2010 Budget at the end of the online registration period (May 17, 2010)

525 people registered
(Note: $12,160 in membership fees NOT included)
(Note: workshops not included)
(Note: $1,300 from Springer NOT included)
(Note: In kind contributions are NOT included)

Revenues	
Registration	$165,440
Extra banquets	$1,445
Extra BBQ	$1,050
Sponsorships	$15,700
Exhibitors	$7,590
TOTAL	**$191,225**

Expenses	
Banquet (food)	$40,198
Banquet (buses)	$1,947
Banquet (piano)	$153
Coffee breaks	$11,839
Mixer	$15,127
BBQ	$5,085
Program (book)	$2,531
Program (CD)	$1,045
PayPal Fee	$5,582
Regis. Fee	$9,713
Committee meals	$4,422
CRM (program prep)	$1,250
Local employees	$5,000
Room, plenary talks	$1,500
Invited speakers	$30,000
Poster boards	$1,844

Signage	$1,375
Walkie-talkies	$226
Parking, exhibitors	$42
Bags and lanyards	$2,500
Translations	$9,250
Printing costs	$500
Unforeseen	$4,000
TOTAL	**$155,129**
PROFIT	**$36,096.50**

5.4.2. Report on the SSC 2011 Annual Meeting

1. Program Committee (Chair : Shelley Bull)

The first priority is getting organization of the invited sessions underway. As in previous years, each of 4 Sections (Biostats, BISS, Probability, and Survey Methods) will be requested to organize 4 invited sessions. A call for invited sessions will be issued shortly after SSC2010, with a deadline no later than 1 August. The program chair is beginning to identify topics and organizers for additional invited sessions. Response of SSC2010 participants to the new introductory topic sessions will be of interest.

A major change recommended by the executive committee is that Sections will no longer be guaranteed funding of $800 per session ($3200 per section). Sections will be required to make funding proposals based on need. The Program Chair plans to develop a working policy for 2010-11 re eligibility and levels.

As a preliminary guideline for room bookings, we are planning for up to 8-10 parallel sessions.

2. Local Arrangements Committee (Chair : Hugh Chipman)

Planning is under way for the 2011 meeting at Acadia University. A seven-person team, led by local arrangements chair Hugh Chipman, has already booked rooms for workshops and scientific sessions (10 classrooms plus a theatre with capacity for all participants). The local arrangements committee is working on arrangements for all aspects of the meeting, including Sunday reception, banquet, coffee breaks, committee meetings, exhibitors, social events, accommodation, local electronic services, conference bag, program book, sponsorship and a registration desk. The local arrangements committee will submit a preliminary budget to the SSC executive at their September meeting and to the SSC board for final approval at the October board meeting. Acadia looks forward to welcoming the SSC to Wolfville in 1 year's time.

Respectfully submitted,
Shelley Bull, Hugh Chipman
Chairs of the 2011 Program and Local Arrangements Committees

5.4.3. Report on the SSC 2012 Annual Meeting

Introduction

The University of Guelph previously hosted the SSC Annual Meeting in 1984, the first time the SSC met independently of the Learned Societies. The central proximity of Guelph to several other universities makes travel very convenient for many statisticians, especially graduate students. In addition, Guelph has both bus and train stations and is close to several airports.

Dates

The 2012 Annual Meeting of the Statistical Society of Canada will be held at the University of Guelph, June 3-6, 2012.

Conference Services

The University of Guelph Conference Services group is very experienced in holding conferences as large as (and larger than) the Annual Meeting of the SSC. We will be working closely with Conference Services on all matters related to holding the meeting. Lisa Tersigni-Holt and Kathy Nahwegahbow in Conference Services have been assisting us.

Accommodations

The University of Guelph has both on-campus residence rooms and very close hotels available. Conference Services controls 3000 regular residence rooms and approximately 400 townhouse accommodations. Four hotels are very close to campus and partner with Conference Services. These hotels, with the number of rooms reserved and distance from campus, are given below:

Best Western (across the street) - 75 rooms
Delta (across the street) - 80 rooms
Days Inn (half a block away) - 70 rooms,
Holiday Inn (about a 20 minute walk) - 30 rooms

Venue

The Opening Reception would be held in the new Science Complex Atrium, a large area that can be licensed for 583 people.

The central venue for the meeting would be Rozanski Hall, a modern state-of-the-art classroom complex centrally located on the university campus. Rozanski Hall has both 600 and 400 seat classrooms, as well as three other rooms suitable for breakout sessions (capacities of 200, 120, and 60). All rooms are equipped with modern audiovisual equipment, and have superior acoustic and visual qualities and comfortable seating. Rozanski Hall is not used for classes in the summer, and is controlled by our Conference Services at the time the meetings would be held.

Additional meeting rooms are located in buildings very close to Rozanski Hall. These also have modern audiovisual equipment, and are also fully controlled by Conference Services.
We have budgeted to use two rooms in the Thornborough Building (capacities of 311 and 100) and two rooms in the MacNaughton Building (capacities of 295 and 157), so that nine concurrent sessions would have a combined seating capacity of 2243. If desired, other rooms can readily be obtained for additional concurrent sessions.

Small meeting rooms are available in several buildings, including Rozanski Hall, the University Centre and MacKinnon (all close together). Several small meeting rooms under the control of our College are available in the MacNaughton Building and the Science Complex; these rooms can be used for free. For the convenience of those with meetings to attend on the Saturday and Sunday prior to the main meeting, we have planned to accommodate these meetings in the new Delta Hotel. We have included hospitality costs for these meetings in our budget.

Food and Beverage

Creelman Hall is a large dining hall that is used in the summer strictly for conference delegates, and all three meals can be served here. It is a 5 minute walk from Rozanski Hall. We plan to include lunch for all three days (Monday to Wednesday) as part of the registration for each delegate and to serve lunch at Creelman Hall. Any meeting (e.g. business meetings) can be individually catered.

Conference Services provides a wide range of food options for conference delegates. Food services at the University of Guelph are consistently the highest rated in a survey of Canadian university students, so we are confident SSC meeting delegates will be well fed!

F&M, a local micro brewery, has agreed to develop a special beer for the conference and we will also investigate having wines commissioned for the conference. These will be served at the opening reception and banquet, as well as other venues.

Coffee Breaks and Exhibitors

Rozanski Hall has a large Concourse area that would be used for coffee breaks and could be used for at least some exhibitors and/or posters. Several other options are available if more space is desired. Coffee breaks will include a variety of beverages in the morning as well as a variety of pastries and fruit. Afternoon coffee breaks will provide beverages and gourmet cookies. We also plan to include coffee on arrival.

Banquet

Among possible options for holding the banquet, we are currently leaning towards holding it in the athletic dome, which will accommodate 750 in a single room. This venue is used for alumni events, retiree luncheons and also for graduation. We have budgeted the banquet at a price point higher than the top rate provided by Conference Services to ensure an excellent meal is served and some beverage is included.

Wherever we hold the banquet, it will be catered by Conference Services, so that we can take advantage of the experience this group has in preparing a wide variety of domestic and international foods.

Budgets

We have worked out two preliminary budgets, one based on 450 registrants and the other on 600 registrants. The budgets are conservative; for example, we typically budgeted at the top end on meeting food costs, and we have numerous ways to accommodate additional miscellaneous expenses within the budget. These two budgets are attached.

Places to Visit near Guelph

Conference attendees coming from a substantial distance may wish to take the opportunity to visit one or more key attractions that are within reasonable travel distance of Guelph. Toronto has numerous attractions, including the Toronto Zoo, the Royal Ontario Museum, and potentially (depending on the schedule) Toronto Blue Jays games. The Stratford Festival is world famous for Shakespearean theatre. Niagara Falls is, of course, another world famous attraction; travel time by car from Guelph is about 1.5 hours.

Support

The Department of Mathematics and Statistics currently has 13 statisticians on faculty and a large contingent of graduate students, and we know this will provide an enthusiastic core group for holding the meeting. In addition, we have several retired faculty and other statisticians in other departments and in the local community who may wish to participate. As noted earlier, the expertise of the university's Conference Services will help to ensure the meeting runs smoothly.

University rooms are provided at a substantially discounted rate for the meeting since the meeting will be hosted by the department. Other support from the university may be forthcoming, but under the current financial situation we have not counted on this in our budgeting.

Alumni Events

Concurrent with the SSC meeting we will hold an event for University of Guelph alumni (not included in the SSC meeting budget) that we expect will attract a substantial number of alumni to the meeting that might not otherwise attend. We will also encourage other universities to hold their own alumni receptions, and we will be happy to facilitate local arrangements.

Child Care

It is expected that on-campus child care will be available for a limited number of children at the University of Guelph Child Care and Learning Centre.

Respectfully submitted,
Brian Allen
SSC 2012 Local Arrangements Committee Chair

5.5.1. Report from the Editor of *Liaison*

Paper vs. Electronic Distribution:

My primary concern at this time is the falling number of SSC members requiring the paper version of Liaison. The May issue was mailed to only 308 members - I believe the total membership is about 1100. New members get the electronic version by default. The additional expense for the mailed copies is about $8 per paper copy ($2500/308): this is in addition to the base cost of about $6 per copy ($7000/1100) for the electronic version. We may need to reconsider our distribution modes, or the funding of them.

Volume Variability:

The May and November issues have been 36-48 pages, while the February and August issues have been 48-68 pages. The 68 page version is at the boundary of a cost threshold (especially postage and mailing) and so submissions that are not so time sensitive should be directed to the February and November issues. Of course, this constraint would vanish if the print version were terminated.

Interviews of Prominent Canadian Statisticians:

Interviews of prominent Canadian statisticians have been recommended in the past and I approve of this suggestion. However, I need some help with this from the Associate Editors. The choice of targets for interviews is a somewhat political statement and I am uncomfortable making this choice myself. I would welcome suggestions for making this choice a group decision. So far there is one interview arranged: Agnes Herzberg is being interviewed by Jerry Lawless. I am not sure when this will actually be ready for publication.

Translation and Editing Credit:

Every issue has received valuable proofreading input from Roman Viveros-Aguilera and Christian Genest. Moreover, a lot of translation expense has been avoided by contributions in two languages by Christian Genest and Christian Léger. My sincere thanks for all these voluntary contributions.

Budget Summary:

The budget for 2009 was $34,000 and the actual expense was $30, 422. Year to date expenses (Feb and May issues) for 2010 are about $14,000, including travel expense for May.

Respectfully submitted,
Larry Weldon
Editor of *Liaison*

5.5.2. Report from the Editor of *The Canadian Journal of Statistics*

By May 22, there are 56 submissions;

Among them,

Special rejection	32;
Major revision	5;
Minor revision	4;
Accepted	2;
Pending	19.

Rough estimate of acceptance rate: 11/43 = 25%;

Review times:

90% submissions are assigned to AE within 4 days;
50% AE assignments completed within 80 days;
80% AE assignments completed within 100 days;

Overdue decisions: 2 submitted in Jan and 3 in Feb

Special Issue: Guest Editor Richard Cook from U of Waterloo
Proposed to have 8 papers, 120 pages.

Respectfully submitted,
Jiahua Chen
Editor of *The Canadian Journal of Statistics*

5.5.4. Report of Executive Editor for SSC of *Statistics Surveys*

Statistics Surveys is jointly sponsored by the ASA, the Bernoulli Society, the IMS and the SSC. Each sponsor appoints an Executive Editor; I fill this role for the SSC. My term runs from 1 January 2008 to 31 December 2010. The SSC has committed itself to the journal for 5 years starting January 1, 2008.

The journal publishes survey papers on line. Its costs are, I think, modest, though I have no direct knowledge of the finances; my duties appear to be limited to editorial work and little enough of that.

The journal is building interest quite slowly. I count 44 submissions since the journal started in 2007. Of these 12 are in the queue, 16 have appeared and 16 have been rejected.

The editorial process is this. Authors submit papers on line. The Coordinating Editor and Executive Editors assign an AE. They may suggest an Associate Editor in which case the paper is usually assigned to that AE. The AE then takes more or less complete control of the editorial process and decision.

This process and the very low submission rate mean that the AEs for the SSC (Christian Genest, Jack Kalbfleisch, Jerry Lawless and Louis-Paul Rivest) have had almost no work to do – 1 paper so far!

Respectfully submitted,
Richard Lockhart
Executive Editor for SSC of *Statistics Surveys*

6.1. Report of the Accreditation Committee

1. Activities of the Accreditation Committee September 2009-May 2010:

   a. **Website and Documents**: the chair maintains the accreditation website; prior to the revamping of the SSC website I made full backups and screen shots of the accreditation pages. I have confirmed that the new site is fully restored to what it was prior to the upgrade. I do incremental backups on a regular basis. There are no significant changes to the website; routine changes include updating the list of accredited members (deleting suspended members, adding those newly accredited in the October cohort). I assisted in editing the 2 main accreditation brochures to bring their content up to date and to print them in the corrected colours of the SSC. These were reprinted in fall 2009 (2500 copies each at a cost of approximately $1800 each)
   b. **Suspensions and additions**: in fall of 2009, a bilingual letter was sent to the 4 P.Stat. and 7 A.Stat. members who were at risk of losing their accreditation due to failure to pay SSC membership or accreditation dues (or both). The following did not respond and were suspended at the end of the year (2009).

Accreditation	#	Name	Affiliation
PStat	#106	Stewart, Delbert E.	(Brogan, Inc.)
AStat	#021	Fu, Longdi	(University of Toronto)
AStat	#010	Ismaila, Afisi Segun	(McMaster University)
AStat	#023	Nevill, Max E. N.	(Checkwell Decision Corp.)
AStat	#002	Singh, Rajendra P.	(Raj Statistical Consulting Services)
AStat	#011	Sun, Jing	(Canadian Mental Health Association)

   The names of 2 new P.Stat. and 4 new A.Stat. were added to the list following their approval at the October 2008 Board meeting. Their names and bios were published in Liaison (V24N1). One of the new P.Stat. is an A.Stat. who is advancing to P.Stat. level. A.Stat. #023 was suspended but he successfully applied to the Accreditation Appeals Committee and his status was restored in April 2010 on payment of missed dues.
   c. **Approval of new P.Stat/A.Stat/Courses:** the February 1, 2010 deadline for new P.Stat. and A.Stat. applications resulted in 7 P.Stat, and 6 A.Stat. applications . (By comparison, a year ago, there were 8 P.Stat. and 6 A.Stat. applications and two years ago there were 5 P.Stat, and 9 A.Stat. applications). All applications have now been reviewed, with 4 P.Stat. and 5 A.Stat. being approved by the Accreditation Committee. For 2 P.Stat, cases the review resulted in a split decision and it was decided to obtain further information and reference letters in these cases; these cases are ongoing. One P.Stat. case was unanimously rejected because the committee felt the application was premature and that he did not have "at least six years practical experience in applying statistics at a substantial level together with acceptable evidence of knowledge, competence, and contributions to the subject and its applications".
   As of December 30, 2009, we have 110 P.Stat. members and 33 A.Stat. members in good standing compared to 103 P.Stat. members and 35 A.Stat. members as of December 30, 2009). This does not include those that might be suspended for default in 2010 or those to be added from the February 2010 competition following Board approval.

In addition, the accreditation committee carefully reviewed packages of course descriptions (to be used by A.Stat. applicants graduating from these Universities) from McMaster University and the University of Alberta and approved them. These are noted for information only: the Board is not required to approve course packages.

The Board is asked to approve the individual A.Stat. and P.Stat. recommendations summarized in 2. below.

d. **Mentoring**: Judy-Anne Chapman has matched all new A.Stat approved at the May 2009 and October 2009 SSC Board meetings with mentors.

e. **ASA Accreditation:** Judy-Anne Chapman is our delegate to the ASA Accreditation committee. The ASA Board meeting of April 16, 2010 approved an accreditation program for the ASA. It provides for an accreditation equivalent to our P.Stat. but has no A.Stat. equivalent. It provides for automatic accreditation of members from sister societies with an equivalent high-level accreditation. SSC members who have the P.Stat. accreditation and are in good standing with the SSC would automatically become accredited members of the ASA upon written request with proof of accredited status, agreement to maintain their accreditation in the SSC, agreement to abide by the ASA's Ethical Guidelines for Statistical Practice, and payment of ASA membership dues and accreditation fees. However, at the end of five years of ASA accreditation, such members must have their ASA accreditation renewed through the ASA's renewal process. The SSC Accreditation committee was consulted on this and approved it noting that 1) We don't foresee any serious problems in the ASA proposal for granting automatic ASA accreditation to SSC P.Stat. holders. It encourages cross-accreditation by expediting the process while ensuring that they maintain their SSC accredited status. 2) The SSC accreditation legal document authorises the recognition of equivalent professional standards and establishment of reciprocal recognition. So, the SSC would be open to establishing a form of expedited accreditation for holders of the ASA P.Stat., as we now do for some accreditations equivalent to the A.Stat. Procedures for reciprocal accreditation will need to be developed and approved once the ASA accreditation criteria are finalised.

f. **Members Services:** (i) as a result of discussion at the accreditation committee meeting at the 2009 annual meeting, the committee agreed to sponsor a professional development session at this year's annual meeting on an issue of interest to accredited members. Mary Lesperance has organized the session, to be held on Tuesday, May 25. The session is a panel discussion on "Privacy Legislation – Implications for Canadian Statisticians" featuring 3 invited speakers and a discussant.

(ii) Judy-Anne Chapman chairs services for accredited members. She has obtained a professionally made video of a workshop (on mixed models and survival analysis, John Amrhein) and is producing others (e.g. the Biostatistics Cancer Research Workshop in Toronto, July 2009). These will be made available to members through the accreditation site. This was delayed by the modifications to the SSC web site, but the new site contains a "members only" area which will be used for professional development materials like these.

(iii) There has been little progress on the accredited members database that was to include each member's summary, translated into both official languages and was to be searchable by the public. The publicly searchable version of the database should be a priority for the coming year, now that the SSC site changes are done. The accredited members will need to be consulted as to the form of this (what information will be displayed, how will database be maintained, etc.)

g. **Concerns and upcoming issues** (to be raised with the AC at the AGM) The work of the accreditation committee needs to be delegated to get the increasingly demanding work done: I perceive a need for (i) a "professional development subcommittee" to develop and promote services for members; (ii) a "constitution subcommittee" to review and update documents (following up on the MacKay and

Oldfield report to the May 2006 Board) (iii) a “public relations subcommittee’ to promote accreditation with prospective members, employers, university departments, etc.

2. Accreditation of new members:

(see next page)

New P.Stat. and A.Stat. of the SSC /
Nouveaux P.Stat. et A.Stat. de la SSC.
2010-Feb-01 Competition

It is with great pleasure that the Board of the Statistical Society of Canada (SSC) awarded the P.Stat. or A.Stat. designation to the following individuals:

C'est avec plaisir que le Conseil de la Société statistique du Canada (SSC) a octroyé la désignation P.Stat. ou A.Stat. aux individus suivants :

Photographs have been requested from candidates but are not yet available in all cases.

NOTE: candidates have been informed of the results of the reviews conditional on approval by the Board. The Chair will notify all candidates of their formal acceptance following Board approval.

P.Stat. 118:
BREWSTER, John F.

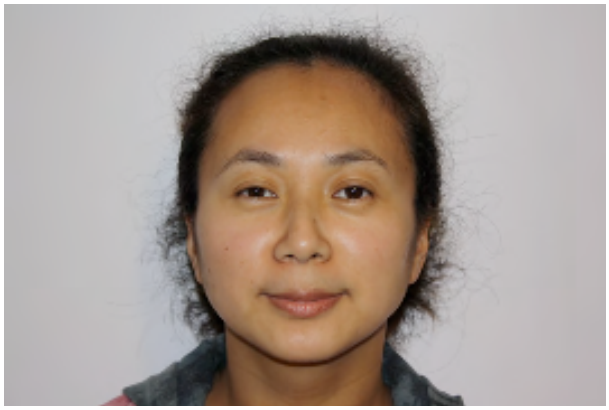
Ph.D. 1972 University of British Columbia, Mathematics
M.Sc. 1967 University of Toronto. Major: Mathematics
B.Sc 1966 University of British Columbia, Major: Mathematics

Current Employer: University of Manitoba

John Brewster is a Professor and Head of the Department of Statistics at the University of Manitoba. John obtained B.Sc. and Ph.D. degrees in mathematics from the University of British Columbia and an M.Sc. degree in mathematics from the University of Toronto. His main research interests are in experimental design, foundations of statistics, statistical decision theory and computer experimentation. He has served the SSC as Secretary, President of the Business and Industrial Statistics Section, Chair of the Publications Committee and as a regional representative on the Board of Directors.

Email: john_brewster@umanitoba.ca

P.Stat. 119:
Yu, Min



MSc	2005	University of Guelph, Statistics
M.A.	1998	Quangdong University, China Economics
B.Sc.	1995	Ocean University of China Mathematics and Statistics

Current Employer: BC Hydro.

I obtained a BSc. in Mathematics & Statistics in 1995 in China and an MSc. in Statistics in 2005 at the University of Guelph. I have solid working experience in modeling, programming, reporting, analyzing, forecasting, interpreting and presenting scientific data; 4 years financial and economic data analysis work experience; and two years of statistical consulting experience in the sciences field, as well as four years marketing research, load forecasting and program evaluation experience in the Utilities field. Through working experience and academic course work, I have developed the skills to professionally compile data and perform statistical analysis. My enthusiasm for statistical research and education in statistics has allowed me to develop an insight into statistical analysis and the ability to interpret and present analysis results of practical studies. Furthermore, I have advanced knowledge in statistical programs (SAS, R, S-Plus, and SPSS). I am a certified SAS base programmer. In recent years, my research interests have been primarily focused on longitudinal data analysis, experimental design, and sampling design.

Email: min.yu@bchydro.com

P.Stat. 120:
MULYATH VARIYATH, Asokan

Ph.D. 2006 University of Waterloo, Statistics
M.Sc. 1987 Kerala Agriculatural University, India.
Major: Agricultural Statistics

Current Employer: Memorial University

I obtained a Ph.D (statistics) from the University of Waterloo in 2006. Before obtaining my Ph.D., I was working as a Technical Officer at the Statistical Quality Control and Operations Research (SQC&OR) Division of the Indian Statistical Institute (ISI) for more than 10 years. My main responsibility included training and consultancy to industries to improve quality and productivity using statistical techniques. Apart from these responsibilities, I undertook research activities to improve quality and productivity. I consulted with many industries such as textile, electronics, paper, cement, electrical, service industries etc. I am also involved in the quality system implementation towards ISO 9000 Quality systems. After obtaining my Ph.D from Waterloo, I worked for two years as a Research Assistant Professor at Texas A& M University under a project from the National Cancer Institute, USA. Presently, I am working as an Assistant Professor of Statistics (tenure track) at Memorial University of Newfoundland. I am engaged in teaching and research in statistics. My research area is industrial quality control and variable selection. I have published papers in leading journals such as journal of quality technology, journal of statistical planning and inference, etc. I used to attend SSC annual meetings regularly and present my research findings.
Email: variyath@mun.ca

P.Stat. 121: **PALTIEL, Charles J.**	MSc 1999 Simon Fraser University Statistics BSc 1993 University of Victoria Mathematics (Economics minor) Current Employer: ICBC. I graduated in 1999 from Simon Fraser University with an MSc in statistics. I spent two years as managing consultant of the Statistical Consulting and Research Laboratory (SCARL) in the Department of Statistics at the University of British Columbia. For five years I was a statistician at the British Columbia Cancer Agency. For the last three years I have been a statistician at the Insurance Corporation of British Columbia. Email: chuck.paltiel@icbc.com

A.Stat. 042: **LIU, Zhihui (Amy)**	M.Sc. 2010 McMaster University, Statistics B.Sc. 2009 McMaster University, Mathematics and Statistics I received my Honours B.Sc. from McMaster University in June, 2009 and gave a poster presentation at the SSC annual meeting in the same month. I am currently in the M.Sc. program in Statistics at McMaster University and working on Bayesian analysis of finite mixture distributions. My research interests include theories and applications of mixture distributions, programming in the R language, high-dimensional data analysis, Bayesian inference, as well as model selection and model comparison. Email: amyatmac@yahoo.ca

A.Stat. 043:
JACKS, Lindsay M.

M.Sc 2008 University of Toronto, Biostatistics
B.Sc 2007 McMaster University, Mathematics & Statistics

Current employer: Princess Margaret Hospital

My name is Lindsay Jacks and I believe my educational achievements and previous work experiences qualify me for the A. Stat. accreditation. I recently returned to Canada to pursue a career as a Biostatistician at Princess Margaret Hospital in Toronto. For the last year and a half, I worked as a Research Biostatistician at Memorial Sloan-Kettering Cancer Center in New York City. I have an Honours Bachelor of Science degree from McMaster University, where I studied Mathematics & Statistics and participated in the Co-operative Education Program. I completed two 8-month work placements at Statistics Canada in Ottawa and the Ministry of Public Infrastructure Renewal in Toronto, respectively. I have a Master of Science degree from the University of Toronto in Biostatistics and completed a practicum placement at Princess Margaret Hospital in the Department of Biostatistics. My recent position at Memorial Sloan-Kettering was a once in a lifetime experience where I realized my true passion for statistics and my desire to work in the health care industry and make a contribution to cancer research. I look forward to expanding my knowledge base and continuing my career at Princess Margaret Hospital, while working towards obtaining the SSC accreditations in the near future.

Email: lindsay.jacks@gmail.com

A.Stat. 044: **LLOYD, Anita M**	M.Sc. 2008 University of Manitoba, Statistics B.Sc. 2004 University of Manitoba, Statistics (minor in Psychology) Current employer: University of Alberta I completed my M.Sc. in Statistics in 2008 and my B.Sc. in Statistics (minor Psychology) in 2004, both at the University of Manitoba. I currently work as a statistician with the Kidney Health Research Group at the University of Alberta. Email: alloyd1@ualberta.ca

A.Stat. 045: **PERRUCCIO, Anthony V.**	Ph.D. 2009 University of Toronto, Epidemiology M.H.Sc. 2002 University of Toronto. Community Health & Epidemiology B.Sc 2000 York University, Canada Double Major: Statistics and Biology Current employment: Post-doc at Harvard Medical School in Boston. Anthony Perruccio has a B.Sc. in Statistics and Biology from York University and a M.H.Sc. and Ph.D. in Epidemiology from the University of Toronto. He is currently undertaking post-doctoral work at Harvard Medical School in Boston. Throughout his doctoral training, he worked at the Arthritis Community Research and Evaluation Unit, Toronto Western Research Institute, University Health Network on projects and studies evaluating the impact of musculoskeletal conditions on individuals and in the population. His current work is looking at the impact of mulitple comorbidities on individuals and its operationalization in health research. Email: perrucci@uhnres.utoronto.ca

A.Stat. 046: **SPEIDEL, Thomas** 	B.Sc. 2002 Dalhousie University, Statistics Current employer: Alberta Health Services. I am applying for the A.Stat. designation based on both my educational background and professional experience. I have a B.Sc. in Statistics from Dalhousie University, seven years of professional experience as a Statistical Associate and Quantitative Analyst, audited several master level courses in biostatistics and epidemiology and have a key interest in graphical display of data. I have worked in cancer research most of those seven years, alongside research scientists and oncologists. I truly enjoy the applied nature of my work as well as the contribution of statistical science and methodology in cancer research. Email: thomas@speidel.ca

Respectfully submitted,
Neil Arnason
Chair of the Accreditation Committee

6.3. Report of the Awards Committee

The 2009-10 SSC Awards Committee consisted of 14 people whose names, end of term, capacity, and voting status are as follows:

Name	End of term	Capacity	Voting status
Christian Genest	*2010-06-30*	*Past past President*	*Chair*
Román Viveros-Aguilera	2011-06-30	Past President	Voting
John F. Brewster	2010-06-30	Regular member	Voting
Gordon H. Fick	2012-06-30	Regular member	Voting
David C. Hamilton	2012-06-30	Regular member	Voting
Donald L. McLeish	2010-06-30	Regular member	Voting
Jean-François Angers	2010-06-30	Chair, Pierre Robillard Award Committee	Voting
David R. Bellhouse	2012-06-30	Chair, Lise Manchester Award Committee	Voting
Christopher A. Field	2011-06-30	Chair, Impact Award Committee	Voting
Kevin J. Keen	2010-06-30	Chair, Case Studies Award Committee	Non-voting
Jerald F. Lawless	2010-06-30	Chair, AusCan Scholar Award Committee	Non-voting
Mary Lesperance	2010-06-30	Chair, CJS Award Committee	Voting
Louis-Paul Rivest	2010-06-30	Chair, CRM-SSC Award Committee	Non-voting
Rhonda Rosychuk	2011-06-30	Chair, Student Presentation Award Committee	Non-voting

The Committee is responsible for the adjudication of the following awards and distinctions:

1- Gold Medal
2- Honorary Membership
3- Distinguished Service Award

Calls for nomination appeared in the August 2009 issue of *Liaison*. A reminder was also published in the November 2009 issue. In all cases, the deadline for receiving nominations was January 31, 2010.

There were two nominations (one new, one continuing) for the Gold Medal, one for Honorary Membership, and one for the Distinguished Service Award. The Committee deliberated in February and early March, 2010. The

process was smooth and after discussion, all decisions were unanimous. Recommendations to the SSC Executive Committee were duly approved and in the case of the Honorary Membership, ratified by the Board of Directors, as per SSC By-Laws.

The 2010 recipients are:

1) Gold Medal: Louis-Paul Rivest, Université Laval
2) Honorary Membership: David R. Brillinger, University of California at Berkeley
3) Distinguished Service Award: Paul Cabilio, Acadia University

The citations are as follows:

1) Gold Medal

"To Louis-Paul Rivest, in recognition of his contributions to the development of multivariate analysis, directional statistics, survey sampling and inference for capture-recapture models, as well as for his numerous applications thereof in various fields, including biology, biomechanics, ecology, and geophysics."

« À Louis-Paul Rivest, en reconnaissance de ses contributions au développement de l'analyse multivariée, de la statistique directionnelle, de la méthodologie d'enquête et de l'inférence pour les modèles de capture-recapture, ainsi que pour les nombreuses applications qu'il en a faites dans différents domaines, dont la biologie, la biomécanique, l'écologie et la géophysique. »

2) Honorary Membership

"To David R. Brillinger, for unwavering support over many years of statistical and other sciences in Canada; for fondamental contributions to the theory of time series and point processes and their applications to seismology, geophysics and population biology; for contributions to the Statistical Society of Canada, particularly as President; and for numerous editorial contributions."

« À David R. Brillinger, en reconnaissance de son appui indéfectible manifesté au fil des ans envers la statistique et la science au Canada ; de ses contributions fondamentales à la théorie des séries chronologiques et des processus ponctuels et à leurs applications en séismologie, en géophysique et en biologie des populations ; de son dévouement envers la Société statistique du Canada, notamment à titre de président ; et pour ses nombreux mandats éditoriaux. »

3) Distinguished Service Award

"To Paul Cabilio, for his voluntary work and dedication to the SSC spanning a period of many years, and his meticulous attention to detail."

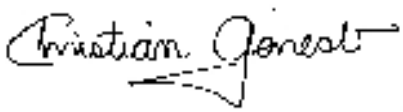
« À Paul Cabilio, en reconnaissance de son engagement envers la SSC et de ses nombreuses années de travail bénévole pour l'organisation, dans un constant souci du détail. »

Actions required:

1- Press releases announcing the above award winners were prepared by the Chair. They will be distributed to the membership on Monday, May 24, 2010. They will subsequently appear in the August 2010 issue of *Liaison*.
2- The unsuccessful Gold Medal nomination package will be transferred to the incoming Chair of the Committee, Román Viveros-Aguilera. If unsuccessful again next year, it should *not* be passed on to the next committee, as it was originally submitted for the 2009 competition.
3- Upon becoming SSC President on July 1, 2010, Donald L. McLeish must appoint two regular members to the Awards Committee (each for a three-year term) in replacement of John F. Brewster and... Donald L. McLeish.

In addition to the above, it is the responsibility of the Chair of the SSC Awards Committee to supervise the adjudication process for the other awards whose winners are determined prior to the Annual Meeting. This year, these were the CRM-SSC Award, the CJS Award, the Pierre Robillard Award, the Lise Manchester Award, and the SSC Award for Impact of Applied and Collaborative Work. Reports from the relevant selection committees should come separately. It suffices to note here that the Chair of the present committee was involved in the production and distribution of all press releases, either in collaboration with, or on behalf of, the Chair of the appropriate committee.

Respectfully submitted,



Christian Genest, Ph.D., P.Stat.
Chair of the SSC Awards Committee

6.3.1. Report of the Award for Case Studies in Data Analysis Committee

Membership

Kevin J. Keen, Chair (term ends 2010-06-30)
Julie Bernier (re-appointed to third term until 2010-06-30)
M'Hamed Lajmi Lkhal Chaieb (re-appointed to second term until 2010-06-30)
Julie Zhou (term ends 2010-06-30)

Report (for information only, no action required)

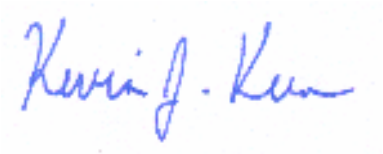
Julie was appointed to the Committee by the President when Alison decided not seek re-appointment for a third term. Many thanks to Alison for her contributions to the Committee and especially her efforts in handling registration and taking care of the webpage for the first two years of existence of this Committee, as in many past years.

There were two Case Studies at the SSC Annual Meeting in Vancouver, 31 May – 1 June 2009. Case Study 1, The Effects of Climate on the Growth of Lodgepole Pine, was organized by Roberta Parish and Charmaine Dean. There were four entries for Case Study 1 with the winning team from the University of Victoria consisting of Eric Cormier and Zheng Sun. Case Study 2, Proteomic Biomarkers for Disease Status, was organized by Rob Balshaw and Charmaine Dean with assistance from Alison Gibbs. There were seven entries for Case Study 2 with the winning team from the University of Victoria consisting of Linghong Lu, Rena Mann, Rabih Saab, and Ryan Stone.

There will be two Case Studies at the 2010 Annual Meeting in Québec City. Case Study 1, The Effects of Photo-Interpreted Variables in the Estimation of Stand-Level Merchantable Volumes in the Province of Québec, has four entries as of the deadline for registration. Case Study 2, Metabolism of Bradykinin and Endogenous des-Arg^9-Bradykinin in Human Plasma: Contribution to the Pathophysiology of Angiooedema Associated with ACE Inhibitors**,** has nine entries. Thanks to Lajmi for his efforts in working with the data contributors for the 2010 competition. Special thanks to Hugh Chipman for mounting the webpages for the 2010 Case Studies Competition during the period transition of the Society's website.

The adjudication committee for both case studies in 2010 will consist of all four members of the Committee and will be chaired by the Chair of the Committee. The value of the award for the winning team of each case study is $500 and this is to be shared equally among the members of the each winning team. Each participant will receive jointly from the SSC and SAS Canada, a certificate of participation. The Committee is grateful to Jamie Farnell at SAS Canada for making these arrangements.

Respectfully submitted,



Kevin J. Keen, Ph.D., P.Stat.
Chair of the Award for Case Studies in Data Analysis Committee

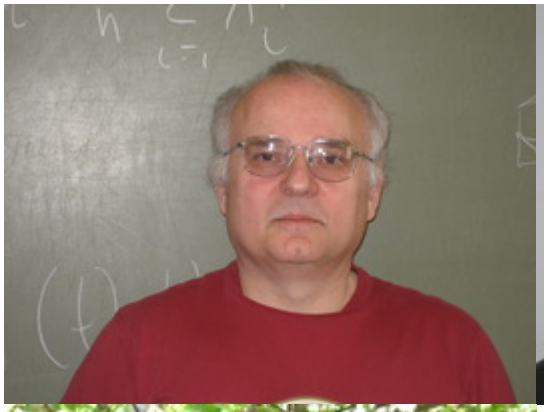
6.3.4. Report of *The Canadian Journal of Statistics* Award Committee

The committee members short-listed and ranked papers in the 2009 volume except for the Pierre Robillard and Gold Medal articles. The article chosen for the CJS award was unanimously selected. Members of the committee were: Mary Lesperance (Chair), Aera Thavaneswaran, Augustine Wong, Grace Yun Yi.

The announcement of the award appears below.

The Canadian Journal of Statistics Award Winners

The Canadian Journal of Statistics Award: Lajos Horváth, Piotr Kokoszka, and Matthew L. Reimherr



The Canadian Journal of Statistics Award is presented each year by the Statistical Society of Canada to the author(s) of an article published in the Journal, in recognition of the outstanding quality of the paper's methodological innovation and presentation.

This year's winner is the article entitled "Two sample inference in functional linear models" (vol. 37, no 4, pp. 571-91), by Lajos Horváth, Piotr Kokoszka, and Matthew L. Reimherr. The paper proposes a method of comparing two linear models in which explanatory variables are functions and response variables can be either scalars or functions. In such models, the parameter vectors (or matrices) are integral operators acting on a function space. The authors show how to test whether these operators are the same in two independent

samples. Their tests are based on statistics whose limiting distribution is always chi-squared, whether the response variables are scalars or functions. In addition to having good finite-sample properties, these statistics are readily computable using the R package FDA. In the paper, the approach is illustrated using egg-laying curves of Mediterranean flies and data from terrestrial magnetic observatories.

Lajos Horváth was born, raised and educated in Hungary. Before joining the University of Utah, he was a postdoctoral fellow at Carleton University from 1985 to 1987 under the supervision of Miklós Csörgő. Lajos is a very prolific researcher. The author or co-author of three books and some 250 papers, he is a specialist in asymptotic theory and its applications in the context of time series, empirical processes, and functional data analysis.

A Professor in the Department of Mathematics and Statistics at Utah State University in Logan, Piotr Kokoszka is originally from Poland. He studied applied mathematics at Wrocław Technical University and probability theory at Boston University. He was a postdoctoral fellow in Salt Lake City and a lecturer at the University of Liverpool before taking his current position in 2000. His research is concerned with stochastic modeling and statistical inference for time series, functional data, and applications to space physics.

Matthew L. Reimherr was born and raised in Salt Lake City. He received a B.S. in Mathematics and an M.S. in Statistics at the University of Utah, under the supervision of Lajos Horváth. He is currently a Ph.D. student in the Department of Statistics at the University of Chicago. His interests are in time series, functional data analysis, and statistical genetics.

Respectfully submitted,
Mary Lesperance
Chair of *The Canadian Journal of Statistic*s Award Committee

6.3.5. Report of the Lise Manchester Award Committee

The committee members for 2010 and the end dates for their terms are:

David Bellhouse(Chair)	2012-06-30
David Andrews	2012-06-30
Louise Bourque	2012-06-30
Jim Zidek	2012-06-30

Christian Genest was an ex-officio member in his capacity as Chair of the SSC Awards Committee.

The Committee advertised in *Liaison* for nominations for this award, but received no nominations. Within the Committee, a search was undertaken to find a worthy recipient for the award. An excellent candidate, Raymond F. Currie, was found and agreed upon. The citation for his award reads.

"To Raymond F. Currie, Executive Director of the Canadian Research Data Centre Network, for his leadership role and vision in bringing the network to a high level of excellence in the promotion and use of a broad range of microdata for research work that has influenced the formation of social and health policies in Canada."

«À Raymond F. Currie, Directeur exécutif du Réseau canadien des centres de données de recherche, dont les qualités de chef et de visionnaire ont permis au réseau d'atteindre un haut niveau d'excellence dans la promotion et l'utilisation de grand ensembles de microdonnées pour des travaux de recherche ayant influence l'élaboration de politiques sociales et de santé au Canada.»

The Lise Manchester Award has been given only twice and on both occasions the nomination has come from within the committee. It is recommended that the SSC revisit the terms of reference for this award to broaden its scope. At the moment the award is for an individual whose publication in the previous two years has had or will have impact on Canadian public policy. The SSC should consider dropping the requirement of a publication and base the award on "statistical work" that has or will have impact on Canadian public policy. The broader term "statistical work" could be a publication, but could also a project or an action undertaken by an individual. It could also include many other things such as the organization of public symposia, with a statistical orientation, about Canadian public policy.

Respectfully submitted.
David Bellhouse
Chair of the Lise Manchester Award Committee

6.3.7. Report of the Student Presentation Award Committee

The Student Research Presentation Award was announced in the August 2009 issue of Liaison and was posted on the SSC 2010 meeting page thereafter. As in 2009, those submitting abstracts had the option to tick a box that indicated the desire to be considered for the award. That action caused a copy of the abstract to be forwarded to **studentawards@ssc.ca** which was helpful in keeping track of submission. In addition to that action, the student had to have a supervisor or department mentor confirm student status eligibility as of December 31, 2009 (by February 15, 2010) and provide a summary of no more than 4 pages by March 15, 2010. The latter deadline was earlier than in previous years (i.e., April 28) to facilitate earlier program scheduling.

There were 59 abstracts submitted for award consideration (12 abstracts were posters, 5 abstracts indicated French language). This number was fewer than in 2009 (80 in 2009, 25 in 2008). Of submitted abstracts, 45 had student status confirmed and 35 provided the summary to be eligible for the competition (5 were posters, 4 indicated French language). One person did not register on time and was removed from the program (oral presentation), leaving 34 confirmed candidates (8 more than in 2009).

As in the previous year, there was still confusion by the candidates in the requirements for consideration and reminders that had to be sent out to either get confirmations or summaries. Potential candidates were given different emails at the different stages and were reminded to register for the meeting. Those that had not provided the summary by March 15, were given an opportunity to submit my March 21. All individuals were emailed confirming entry in the competition or removal from the competition.

There was also some confusion between this award and the Student Travel Award program. Some applied to one award when they really intended to apply for the other. There was also confusion on whether or not a past winner could compete again. The terms of reference did not make any statement about such a situation and past winners were not disqualified from competition.

The Committee revised the score sheet to make it bilingual.

A call for volunteer judges was sent April 19, 2010, on the d-ssc mailing list with a second and third call on May 2 and 6, respectively. That approach secured 12 volunteer judges. Further, on May 6, 2010, past judges were contacted to ask if they would be willing to volunteer again. Three additional judges were recruited, bringing the total to 15 at the time of writing (May 6, 2010) although recruitment of additional judges is ongoing. In addition, the Chair and two Committee members will be able to judge (18 total). The scheduling of judges to presentations will occur the week of May 10, 2010. The goal is to have each presentation adjudicated by 3 judges. If an insufficient number of judges volunteer, this goal may be revised to 2 judges to facilitate a feasible judging workload (i.e., no more than 6 presentations).

Program Chair Christian Léger scheduled candidate presentations into contributed paper sessions by topic and had all candidate presentations scheduled on Monday May 24 or Tuesday May 25. Judges will be provided email packages (instructions, score sheets, abstracts, summaries) and have paper packages included with the registration package. Judges will be instructed to return the complete score sheets to the registration package for pick-up before the scores are tallied.

The Committee thanks Thierry Duchesne, Christian Léger, Duncan Murdoch, and Mary Thompson for various assistance and advice during the process. We are grateful to the volunteer judges and look forward to the upcoming meeting.

Recommendations:

1. As in the previous year's suggestion, it would be good if at the time of abstract submission in addition to ticking a box that says the individual wants to be entered into the competition, that the individual has to tick a box that says the individual has read the description and requirements of the award.
2. Relatively few presentations are for posters. In future, if the submissions continue to grow it may be more feasible to actively encourage poster submissions or restrict the number of oral presentations.
3. The terms of reference for the award be altered so that past winners are not eligible to compete and that the timelines on the research summary deadline be changed (currently says four weeks prior to the meeting which is too short a timeline for scheduling the program).

Respectfully submitted,
Rhonda Rosychuk (Chair of the Student Presentation Award Committee)
Sylvia Esterby and David Haziza (members)

6.4. Report of the Committee on Membership

The membership numbers as of May 7 are below (thanks Denise): there is little change in the numbers over 2009, so assuming a comparable AGM, we can expect to maintain our membership of a little more than 1K in total, well above the levels of 3 years ago. Bovas has been proactive in maintaining the institutional memberships. The membership committee has not actively campaigned for additional new members in part because, at least in my view, our first priority should be maintaining and adding to the services to the large number of members we currently have. Further activities that benefit non-university statisticians, teachers, lecturers, business, finance professionals, etc. might be considered when seeking broader membership.

SSC Membership Count by Type

6.5. Report of the Committee on Women in Statistics

Membership:

Julie Horrocks (Chair)	2011-06-30
Cynthia Bocci	2010-06-30
Joanna Flemming	2010-06-30
Nadia Ghazzali	2012-06-30
Susana Rubin-Bleuer (ISI Rep.)	2012-06-30
Leilei Zeng (Caucus Rep., ASA COWIS Rep)	2011-12-31

Invited Session at SSC:
COWIS/Caucus Invited Session at SSC 2010

An invited session at the 2010 SSC Conference, sponsored by the Committee on Women in Statistics and the Caucus for Women in Statistics is being organized by Joanna Flemming, Dalhousie University. The session title is "Statistics in Conservation". The session features 3 speakers:

- Eva Cantoni, University of Geneva, Switzerland, speaking on "A Random Effects Hurdle Model for Shark"
- Julie Horrocks, University of Guelph, speaking on "Estimating Abundance of Animals from Correlated Binary Data"
- Laurie Ainsworth, Simon Fraser University, speaking on "Zero-inflated Spatial Models for Environmental Data: Clustered Zeros versus Spatial Outliers"

Social Event:
COWIS/Caucus will also sponsor a social event at 2010 SSC. Interested men and women met are invited for dinner Monday at 6 pm at the Chez Greco Restaurant. This event was organized by Nadia Ghazzali.

COWIS Website:
The SSC Committee on Women in Statistics continues to maintain its own website, at
http://www.ssc.ca/women/index_e.html,
with information on our past and future activities at SSC conferences, reviews of books and articles of interest to our members, links to sites on mentoring and other issues, and links to organizations with goals that are similar to our own.

Profiles of 4 currently active female statisticians are posted on our website. The profiles consist of a set of questions (chosen from a list by the respondent) and answers. The profiles have recently been posted on the COWIS website. The goal is to highlight successful individuals and show women role models for others who might be thinking of such careers. We plan to continue to expand our collection of profiles of female statisticians in Canada.

Study of participation of women in statistics in Canada:

We continue to analyze the data on the participation of women at the SSC meetings, in line with our mandate to "study the participation of women in statistics in Canada". A publication on our website will be forthcoming shortly.

Liaisons:

We now have representatives on several similar committees outside Canada. Susana Rubin-Bleuer is our representative on the Committee on Women in Statistics of the International Statistical Institute (ISI CWS). The ISI CWS shares several goals with the SSC COWIS. Susana's responsibilities in this position consist of assisting in networking in Canada, providing reports of relevance to women statisticians and to the ISI and encouraging nominations of women as members of ISI. Leilei Zeng is our representative on the American Statistical Society Committee on Women in Statistics (ASA COWIS) and on the Caucus for Women in Statistics.

Respectfully submitted,
Julie Horrocks
Chair of the Committee on Women in Statistics

6.7. Report from the Research Committee

Members: Derek Bingham, Richard Cook (Chair), Joanna Flemming, Louis-Paul Rivest, Doug Wiens

1. FUNDING DECISIONS FOR 2010

A report summarizing the results of the 2009-2010 Discovery Grants competition has been posted at

http://www.nserc-crsng.gc.ca/Professors-Professeurs/Index_eng.asp (English)
http://www.nserc-crsng.gc.ca/Professors-Professeurs/Index_fra.asp (French)

Within the Mathematics and Statistics Committee the success rate for renewal applications from established researchers was 69.8% with an average funding level of $21,494/year, while early career researchers had a success rate of 73.2% with an average funding level of $14,400/year.

Data on success rates by sub-discipline within Mathematics and Statistics will not be forthcoming.

An additional report from the Mathematics and Statistics Committee will be coming out at the end of May following the COGS meeting.

2. NSERC INFORMATION SESSION AT SSC

NSERC Program Officers Catherine Podeszfinski and Judy Foster are leading a one hour information session on the grant review process this year as well as the new conference model used to evaluate Discovery Grant applications. This will be held on Monday May 24, 2010 at 18:00h in VAN 1245A.

3. COMMUNICATION OF FEEDBACK FROM SSC TO NSERC

There is general concern regarding variation in success and funding levels over grant cycles. This increased variation coincides with the adoption of the Conference Model at NSERC and may be further influenced by the merging of the Mathematics GSC with the Statistics GSC. Concerns will be communicated to NSERC through a report from the SSC Research Committee. The SSC Research Committee welcomes input and assistance in writing this report.

4. NSERC MATHEMATICS AND STATISTICS LIAISON COMMITTEE

NSERC initiated a Mathematics and Statistics Liaison Committee in December, 2009. There were teleconferences in December 2009 and a face to face meeting in Ottawa in February, 2010. The current membership is Madeleine Bastien (NSERC), Richard Cook (Waterloo; Stat), Thomas Hillen (Alberta; Math), Jacques Hurtubise (McGill; Math), Gail Ivanoff (Ottawa; Group Chair), Rachel Kuske (UBC; Math), Anthony Lau (Alberta; Math), Louis-Paul Rivest (Laval; Stat), Anne-Marie Thompson (NSERC).

The mandate of this Liaison Committee includes:

3. Communicating on developments at NSERC that affect the Mathematics and Statistics communities. Reporting on statistics of outcome of competitions, developments in the peer review process, new programs and processes, etc.

4. Discussing potential initiatives within the Mathematics and Statistics community which might relate to NSERC. Sharing information for long range planning exercises of the Mathematics and Statistics community.

5. Provision and discussion of suggestions that the Mathematics and Statistics community may have regarding NSERC programs.

6. Discussion of matters that will help to inform the Group Chair for their participation in the Committee on Grants and Scholarships (COGS).

5. NSERC LONG RANGE PLANNING EXERCISE

NSERC is requesting that the Mathematics and Statistics communities undertake a long range planning exercise. This is an important exercise for the future of our discipline since it will involve setting priorities for areas of research funding within Mathematics and Statistics, and will involve reevaluating the way funds are dispersed within NSERC to different programs (e.g. Major Resources Support Program, Discovery Grants, etc.). This initiative will also be discussed at the NSERC Information Session on Monday May 24, 2010 at 18:00h in VAN 1245A. There will be appointments of statisticians to this committee and Richard Lockhart (Chairs and Heads Committee) will solicit names for consideration.

6. NATIONAL STATISTICS INSTITUTE

This NSERC Long Range Planning exercise may involve re-visiting the notion of a National Statistics Institute. Charmaine Dean and Richard Lockhart have organized a panel discussion on The Roles, Benefits and Importance of a National Statistics Institute, on Sunday, May 23, 16:15h (VAN 1245A). Autonomy and influence are becoming increasingly important for our discipline given recent changes at NSERC and elsewhere, and this timely panel discussion offers an opportunity to reconsider the creation of such an institute.

7. LIAISON ARTICLES ON FUNDING OPPORTUNITIES

A series of articles was launched for Liaison in February 2010. The first two articles were On Funding Opportunities for Biostatistics (February, 2010) and Research Funding: Beyond the Discovery Grant (May, 2010, Derek Bingham). Joanna Mills-Flemming is writing the third article for the next issue. Ideas for topics of this column or people to write articles are welcome.

Respectfully submitted,
Richard Cook, University of Waterloo
Chair of the Research Committee

6.8. Report of the Statistical Education Committee

For information only.

Committee Membership

Member	*Province*	*Term ends*
Alison Gibbs *(Chair)*	Ontario	2011-06-30
Rollin Brant	British Columbia	2010-06-30
Jean-Pierre Carmichael	Quebec	2010-06-30
Veeresh Gadag	Newfoundland	2010-06-30
Catherine Njue	Ontario	2012-06-30
Kevin Thorpe	Ontario	2010-06-30
Saumen Mandal	Manitoba	2012-06-30
Patricia Whitridge	Ontario	2010-06-30

Several committee members' terms are coming to an end. Some have asked to continue and others to retire from the committee. The geographical diversity of the committee has been an important strength.

Activity in 2009-10:

- *Application to NSERC PromoScience*: The committee submitted an application to the NSERC PromoScience program for funding to work with Statistics Canada to support resource teachers to visit schools to work with teachers and students on Census at School. Unfortunately, this was not funded and the feedback received was not promising for future applications.
- *Workshop for Teachers of Grades 7 and 8*: On 7 May 2010 a workshop on statistical thinking for teachers of grades 7 and 8 was held at the University of Toronto Mississauga campus. This was fully funded by the SSC. Seventeen teachers attended. Paul Fields of Brigham Young University was an inspiring leader, giving both an introductory address and an activity session. Other hands-on sessions were led by Kevin Thorpe and by Mary Townsend of Statistics Canada and Cynthia Rutledge, a Statistics Canada resource teacher. The workshop was organized by Kevin Thorpe (chair), Alison Gibbs and Alison Weir. The group of teachers who attended was keen and engaged and feedback has been very good. Many teachers talked about how to more widely spread what they learned and important connections were made for future teacher professional development and curriculum reform.
- *Meeting Within a Meeting*: We are working with the ASA to add some Canadian content to the Meeting Within a Meeting, a workshop for middle and secondary school teachers being help in Vancouver during the JSM. Despite the Canadian location and several early approaches from us to the ASA Education Department, we were invited to participate in the planning only after the program was very close to being finalized. We managed to secure space during the workshop for Statistics Canada participation in a Census at School information session and a short introduction to the role of statistics in the local curriculum. The SSC will be subsidizing the registration fee of Canadian teachers who attend (at the same level that the ASA will be subsidizing the registration of American teachers).
- *Regional Data Fairs*: The Halton Peel Data Fair for middle school students was held on 30 April 2010. Kevin Thorpe attended on behalf of the SSC. He awarded two SSC prizes of $125 each.

- *Canada Wide Science Fair*: The Canada Wide Science Fair is being held 15-23 May 2010 in Peterborough, Ontario. Michelle Boué, a statistician in the Department of Mathematics at Trent University, has agreed to judge for the SSC prize.
- *Contributions to SSC Annual Meeting*: The committee is sponsoring two invited paper sessions at the SSC annual meeting in Québec:
  1. Session 14D: "What can we learn from each other about teaching statistics?"
     Organizers: Alison Gibbs and Bethany White
     Speakers: Bob delMas (University of Minnesota), Dennis Pearl (Ohio State University) and Bethany White (University of Western Ontario)
  2. Session 2D: "Innovative Tools in Teaching Statistics"
     Organizers: Zeny Mateo and Saumen Mandal
     Speakers: Paul Corey (University of Toronto), David Loewen (University of Manitoba), and Larry Weldon (Simon Fraser University)

New Activity Upcoming in 2010-11:

- *International Statistical Literacy Project Competition*: Registration for the Second International Statistical Literacy Competition will begin in the fall of 2010. The international stage of the competition will take place in Dublin, Ireland during the ISI meeting in August, 2011. We will be helping with the Canadian stage of the competition and fundraising for the travel of Canadian student (ages 12-18) winners to Dublin.
- *Canadian Statistics Educator Network*: Bethany White of UWO is starting this with funding from STLHE. It will be introduced in a session at the SSC meeting in Québec.

Respectfully submitted,
Alison Gibbs
Chair of the Statistical Education Committee

7.2. Report of the *ad hoc* Committee for New Investigators

The current members of the ad hoc committee for new investigators are:

Juli Atherton (McGill)
Yulia R. Gel (Chair, Waterloo)
Katherine Davies (UManitoba)
Geneviève Lefebvre (UQAM)
Jason Nielsen (Carleton)
Jeffrey D. Picka (UNB)
Matias Salibian-Barrera (continuing member, UBC)

Activities

1. On Tuesday, May 25 at 16:25 – 17:55 Session 10D, the NI Committee will hold its first invited panel discussion on problems and issues met by junior researchers, which includes job interviews, grant proposals, papers, consulting, collaborating, balancing life etc. The confirmed speakers are Kelly H. Zou, Pfizer Inc. and Harvard University, Paul Cabilio, Acadia University and Nancy Reid, University of Toronto.

2. We also hold an informal get-together party of junior researchers on Sunday, May 23 at 8pm.

3. Meetings with junior researchers and questions raised during our 2006-2010 activities indicate that the NI Committee can not only play an important role of an open forum for junior investigators but also bridge newer SSC members with the society as a whole. Hence, the NI Committee seeks to apply for a permanent status within SSC.

Respectfully submitted,
Yulia R. Gel
Chair of the *ad hoc* Committee for New Investigators Committee

7.4. Report of the Ad Hoc Office Contract Negotiation Committee

The negotiations over a new office contract are proceeding satisfactorily, though more slowly that we would like. I expect to have a draft proposal for a two-year contract at the time of the board meeting or before. Bovas and I met with Johan Rudnick, the Executive Director of the CMS office on Monday April 19 and had a very good discussion about the principles of a new contract. He was in agreement with the principles we has suggested earlier and promised to build a draft agreement around them, specifically:

- **Predictability:** including regular expenses, including office expenses, meeting registrations and IT under the contract·
- **Flexibility and assured total service:** - a base core level of pre-defined service and the ability of the SSC to essentially 'buy hours' around those services from the CMS. Some flexibility to change priorities (what services the SSC 'buys')
- **Transparency:** - continued quarterly reporting and separate accounting of special projects
- **Synergy:** possible synergies (and cost sharing) in functional areas of common collaborative interest
- **Administration:** - a flexible two-year term , simplifying charge rates

We requested that a person in the office is designated with responsibility for administering SSC, keeping track of the SSC schedule of activities and coordinating these activities with the SSC executive.

Johan has committed to work to provide a draft proposal that includes these features in time for the SSC Board meeting in May and for the CMS Board meeting in June. This draft proposal will be vetted through an ad hoc committee (Bovas Abraham, David Binder, High Chipman and me) before presentation to the executive and board. A critical element in the organisation of the SSC office is an SSC executive-director "on the scene" both as Liaison with the office and to ensure that SSC assignments do not disappear in the cracks. This critical function has been and will be capably handled by David Binder (Until December 2010).

As a general principle, wherever possible, I would like to reduce the burden to SSC committees and committee chairs by collaborating with CMS and others. This may mean that, when our interests overlap, we nominate members to a corresponding CMS committee rather than maintain an independent SSC committee. In general, one of the prime advantages of maintaining and furthering contacts with the CMS is to generate more synergies, in office operations such as electronic services, as well in increasing the level of literacy and the profile of statistics and mathematics in the wider community.

Respectfully submitted,
Don McLeish
President-Elect, Chair of the Office Contract Negotiation Committee

8.1. Report of the Biostatistics Section

Quebec City Meeting:

Sessions are set, including two sessions developed in collaboration with the Kalbfleisch/Lawless conference at Waterloo. The section workshop, to be given by Miguel Hernan (Harvard), on causal methods, has been very well-received.

Section goals for 2009-10:

Interaction with other Societies: The SSC biostatistics Liaison (Robert Platt) sits as an ex-officio member of the board of the Canadian Society for Epidemiology and Biostatistics, with the goal promoting interaction between the two societies. It remains clear that SSC biostatistics can provide useful input into CSEB through sponsored sessions and workshops, which have been successful. However, it was less clear how the reverse would work (since relatively few biostatisticians are members of CSEB and not SSC). Finally, the 2011 Congress of Epidemiology (international meeting of several societies, including the CSEB) will be held in Montreal in June 2011. This may be a good opportunity for interaction between the SSC and the CSEB and the other major societies (Society for Epidemiologic Research, American Congress of Epidemiology, etc).

Advocacy: We have continued last year's work on raising the profile of biostatistics, in particular with regard to the position/role of biostatistics in universities and funding agencies, and in the peer-review process. The CIHR's Strategy for Patient Oriented Research represents a significant opportunity for the SSC and the Biostatistics section to lobby for capacity for biostatistics in the clinical research centres across Canada. Further interaction is expected.

Respectfully submitted,
Robert Platt
President of the Biostatistics Section

8.2. Report of the Business and Industrial Statistics Section (BISS)

1. Based on the Society's membership list of March 31, 2010, the Section has 124 registered members.

2. The Executive conducted an extensive consultation with the Section members, seeking input regarding topics for invited paper sessions and workshops for future annual meetings. The input guided us in good measure in the organization of sessions for SSC 2010 in Quebec City.

3. One workshop, the Isobel Loutit Invited Address on Business and Industrial Statistics and 3 invited paper sessions are being organized for SSC 2010. In addition we had come to an agreement with Probability Section to co-sponsor a joint invited session. Our preliminary program for SSC 2010 (session titles and organizers) is enclosed.

4. The Section's web site is being updated.

5. The Section budget prepared by our Treasurer (Marc Fredette) for 2010. Our finances are in reasonable shape (see attached).

6. The Section Executive Committee for 2009-2010 consists of:

   President: Smiley Cheng (University of Manitoba)
   President-Elect: Will Welch (University of British Columbia)
   Past-President: Román Viveros-Aguilera (McMaster University)
   Secretary: Shirley Mills (Carleton University)
   Treasurer: Marc Fredette (Université Laval)

Respectfully submitted,
Smiley Cheng
President of the BISS

8.3. Report of the Probability Section

(For Information Only)

The Probability Section's By-laws, which were passed at the Section's AGM in 2008, were approved by the SSC Board this past year.

I wish to welcome new members to our Executive:

Yiqiang Zhao, President (2010-2011)
Hao Yu, President Elect (2010-2011)
Francois Watier, Secretary (2010-2013)

The Probability Section co-sponsored our first Workshop at the 2010 Annual Meeting (Quebec City). It is a joint venture with the Business and Industrial Statistics Section and will feature Christian Genest (Laval) and Johanna Nešlehová (McGill) as the speakers. The topic is: "Copulas: Introduction to the Theory, Implementation in R, with Applications in Finance and Insurance." There are over 30 registrants as of May 6th.

We are offering four invited sessions at this meeting.

- "Probability, Regression and Time Series" is co-sponsored by the Business and Industrial Statistics Section and is organized by Rafal Kulik (U. of Ottawa) and Hao Yu (Western) and features talks by Reg Kulperger (Western), Wei Biao Wu (University of Chicago) and Yuliya Martsynyuk (U. of Manitoba).
- "Probability and Finance," organized by Rafal Kulik, (U. of Ottawa) features talks by Miklós Csörgő, (Carleton), Bruno Rémillard, (HEC-Montréal) and Anatoliy Swishchuk, (U. of Calgary).
- "Stochastic Dynamics in Biology," is organized by Lea Popovic, (Concordia). The speakers are: Nicolas Lanchier (Arizona State U.), John Mayberry (Cornell), and Anita Winter, (TU München).
- "Stochastic Models in Population Genetics," is organized by Sabin Lessard, (U. de Montréal) and features John Wakeley (Harvard), François Rousset, (CNRS & U. de Montpellier), Martin Möhle, (U. of Tübingen) and Robert Griffiths (Oxford).

There are two Contributed Paper sessions that are sponsored by the Probability Section, "Risk Theory and Probability Theory in Finance" (co-sponsored by the Business and Industrial Statistics Section) and "Probability."

I wish to thank the Program Committee, Rafal Kulik, Neal Madras and Hao Yu, for organizing this impressive invited program. I wish to also thank Bruno Rémilliard, our Section Past-President, for his work on organizing the joint workshop with BISS. Thanks also go to Raluca Balan and Gail Ivanoff for their fine work with the Treasurer's duties.

Richard Lockhart's term as Secretary ends this July. I especially wish to thank him for his excellent work and for his valuable advice throughout my term.

Respectfully submitted,
Murray Burke
President of the Probability Section

8.4. Report of the Survey Methods Section

1. Report on Elections

As of July 1, 2010, Pierre Lavallée from Statistics Canada takes office as President of the Section; David Haziza from the Université de Montréal is the President-Elect and Lenka Mach will start her third two-year term as Section Treasurer.

For the year starting July 1, 2011, we need to elect a secretary and a president-elect.

2. Review of 2009-2010 activities

For the 2010 SSC Meeting in Quebec, the Survey Methods Section organized a presidential invited session, three invited sessions and a one-day workshop. Several members of the Section will also participate in three contributed sessions in survey methodology. The Section will hold its annual general meeting at the conference on May 24, 2010 at 6:00pm. Details of activities are as follows:

The presidential invited session- session 5A: (Organizer: Steven Thompson, Simon Fraser University).

- Dual Frame Landlines and Cell Phone Surveys (Michael Brick, Westat).

Invited sessions:

- New Developments in Modelling Using Survey Data – session 7B (Organizer: Lenka Mach, Statistics Canada)
- Quality in Surveys – session 9C (Organizer: Laurie Reedman, Statistics Canada)
- Network Sampling – session 14C (Organizer: Steven Thompson, Simon Fraser University)

Contributed sessions:

- Nonresponse, Imputation, and Bootstrapping – session 9H
- Methodological Issues in Designing Surveys – session 10H
- Estimation in Survey Sampling – session 12G

Full-day workshop (organized by Pierre Lavallée):

- Small Area Estimation, by Pascal Ardilly from the Institut national de la statistique et des études économiques (INSEE), France.

The Section also helped organize an invited session for the 2010 JSM in Vancouver, B.C. intended to focus on methodological issues in the meta-analysis of observational studies. The speakers are Karla Fox (Statistics Canada), Lauren Griffin (McMaster University) and George Wells (University of Ottawa Heart Institute).

3. Student award

We received three submissions for the 2009 best student paper award. Emily Berg from Iowa State University won the prize of $500 and a certificate for her paper, co-authored with Wayne Fuller also from Iowa State University, entitled “A Spree Small Area Procedure for Estimating Population Counts”. The paper appears in the 2009 Proceedings.

4. Proceedings

Each year, the Survey Methods Section publishes the proceedings of all invited and contributed papers and special talks presented at the SSC annual meeting that are related to survey methods. The proceedings with bilingual abstracts, from the annual meetings of 1995 to 2009 are available at http://www.ssc.ca/survey/SMSProceedings_e.html. The content is free to download.

5. Treasurer's report

The balance on December 31, 2009 was $15,554.31.

6. Membership

Section had 91 paying members in 2009. A bilingual Newsletter keeps members informed of our activities.

Respectfully submitted,
Steven Thompson
President of the Survey Methods Section

9.1. Report of the Statistical Society of Ottawa

The Statistical Society of Ottawa (SSO) has over 100 members working in government, universities, hospitals and industry. However, we have even a greater following with an email distribution list of approximately 200 email addresses. The Society aims to organize events to foster professional development and networking for the Ottawa statistical community.

It has been a busy and productive year. Events held were as follows:

1. The 1st Annual Student Research day was held at the University of Ottawa in September, 2009. There were presentations from students, a networking lunch, followed by a workshop on R in the afternoon. There are tentative plans to hold another Student Research Day in the fall of 2010 at Carleton University.
2. The 7th Annual Seminar for 'Our Statistics Community' was held in November, 2009. There were presentations from researchers working in the academic, public and private industry that covered a variety of topics. Dr Naomi Robbins gave a workshop on the effective use of graphs. The Seminar included a networking lunch.
3. The Spring Symposium and Workshop was held on April 19 and 20th, 2010 and focussed on the theme of data mining. This event included a day long workshop that was given by Dr. Hugh Chipman of Acadia University. The Symposium included presentations from Dr. Chipman as well as Dr. Rafal Kustra from the University of Toronto, and other statisticians from the Ottawa area who do research in the field of data mining.
4. The SSO also sponsored a student prize for the best poster at a student research day at the University of Ottawa in April, 2010.
5. Our Annual General Meeting will be held in June.

For additional information about the SSO and its past and present events, please view its website hosted on **www.ssc.ca**.

Respectfully submitted,
Paul Villeneuve, PhD, P.Stat
President of the Statistical Society of Ottawa

9.2. Report of the Southern Ontario Regional Association

The Southern Ontario Regional Association of the Statistical Society of Canada, which is fused with the Ontario Chapter of the American Statistical Association, has approximately 84 formal members although our mailing list reaches almost 400 individuals with an interest in statistics.

During the past year, SORA has sponsored and organized the following activities:

1. In conjunction with The Applied Biostatistics Association, SORA organized a workshop on Applied Bayesian Methods in Business and Biostatistics on May 13, 2010. This full day workshop with plenary sessions in the morning and parallel workshops on software applications in the afternoon attracted 68 participants at a fee of $95. This year marks the fourth year in which these workshops are offered.
2. Sponsorship of Amanda Ens, a Grade 8 student at Eastview Public School in Oakville, to travel with her teacher Karen Livingston Jeffrey to Durban, South Africa in August, 2009, to compete in the International Statistical Institute's International Statistical Literacy Competition. Ens received Second Prize in the Age Category 12-14 years. SORA contributed $200 and organized the raising of additional private funds to support Ens' trip.
3. Sponsorship of the Southern Ontario Graduate Student Day to be held on May 27. SORA has agreed to contribute $500.
4. Sponsorship of the SORA Seminar Series on Analytics in Business & Industry. Nine seminars have been organized in the past year. They attract an audience consisting primarily of statisticians working in business and finance.
5. SORA is launching a wiki site to support collaboration related to statistical education and organization.
6. Our Annual General Meeting was held on May 13, 2010.
7.

Additional information is available through our website at **http://www.math.mcmaster.ca/peter/sora**.

Respectfully submitted,
Georges Monette, PhD, P.Stat
President of Southern Ontario Regional Association
